Report on Business

1. Provide a general overview and discussion of the development of the Issuer’s business and operations over the previous month. Where the Issuer was inactive disclose this fact.

The Issuer’s has advanced its tailings remediation and precious metals recovery operations in Central America during the period.

The Issuer’s business is environmental reclamation and precious metal recovery. The Issuer is pursuing business opportunities in Central and South America. As part of its business, the Issuer is applying innovative technologies to reprocess artisanal tailings to achieve soil remediation and metals extraction.

The Issuer is engaged in artisanal tailings remediation focused on Central America with expansion targets across Central and South America. The opportunities pursued by the Company arise from artisanal mine tailings and recycling in these regions.

While most tailings operations enjoy low operational costs, Newlox’s approach benefits from higher grades characteristic of artisanal tailings due to the inefficiency of artisanal mineral processing techniques. In addition to precious metals recovery, the Company’s processing technology is designed to remediate artisanal tailings and remove historical pollution. During the period, the Issuer continued to implement its plan to ramp-up gold production at Processing Plant 1.

Presently, the Newlox Gold team is working to complete the ramp-up of Project 1 (our operational tailings remediation project), the commissioning of the Boston Project (Plant 2), and the advancement of permitting for the Company’s expansion in Colombia.

During the period, the Issuer successfully procured all equipment needed to complete the planned electrical upgrade at its Boston Project (Plant 2) in Costa Rica. All necessary components were on-site and in the Company’s possession. Of particular importance, given the global shortage of this equipment, is an electrical transformer, which was delivered and is awaiting installation on site.

The issuer also announced that it has closed a second tranche of a previously announced unsecured non-brokered Convertible Debenture Financing (the “Offering”) for gross proceeds of \$367,500. The total gross proceeds for both tranches are \$1,152,500. The Company expects to close a third and final tranche in mid-January 2024.

The debentures’ principal amount will become due in two years from the closing date and will carry an interest rate of 10% per annum, with interest payable semi-annually. Principle and any accrued interest are convertible at the option of the investor at a conversion price of \$0.15 per common share (the “Conversion Price”) from the closing date until the day before maturity. On maturity, the Company will have the option to pay the principal and any accrued interest in cash or shares at the Conversion Price.

2. Provide a general overview and discussion of the activities of management.

Management has been active during the period overseeing optimization and commercialization work at the Company’s first artisanal tailings reclamation facility, managing commissioning work at the Boston Project, and evaluating expansion opportunities in Central and South America. Key

management personnel were deployed to the field during the period to advance the above initiatives. In particular, management were deployed to Colombia during the period to sign an agreement to acquire the Coexistence Project (the “Coexistence Project”) in San Roque, Department of Antioquia, Colombia.
