Report on Business

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

The Issuer's has advanced its tailings remediation and precious metals recovery operations in Central America during the period.

The Issuer's business is environmental reclamation and precious metal recovery. The Issuer is pursuing business opportunities in Central and South America. As part of its business, the Issuer is applying innovative technologies to reprocess artisanal tailings to achieve soil remediation and metals extraction.

The Issuer is engaged in artisanal tailings remediation focused on Central America with expansion targets across Central and South America. The opportunities pursued by the Company arise from artisanal mine tailings and recycling in these regions.

While most tailings operations enjoy low operational costs, Newlox's approach benefits from higher grades characteristic of artisanal tailings due to the inefficiency of artisanal mineral processing techniques. In addition to precious metals recovery, the Company's processing technology is designed to remediate artisanal tailings and remove historical pollution.

During the period, the Issuer implemented its plan to re-start gold production at Processing Plant 1 at its newly acquired nearby location adjacent to the Company's recently announced Boston Project (Plant 2). The new larger site allows for a future increase in the project scale.

As part of the re-start process, the Issuer announced that pouring of gold at the Company's first environmentally positive processing plant in Costa Rica has recommenced. Newlox Gold is now operating a significantly enhanced processing plant, and plans to build productivity towards its growth objectives.

Additionally, the Issuer announced the appointment of [Dr. Marcello Veiga](#) as Chairman of Newlox Research and Development Corporation. As a global authority on artisanal and small-scale mining, Dr. Veiga brings to Newlox R&D his over 40 years of experience. He has served as a metallurgical engineer and environmental geochemist for mining and consulting companies, a professor at the Norman B. Keevil School of Mining Engineering at the University of British Columbia, and as the Chief Technical Advisor of the GEF/UNDP/UNIDO Global Mercury Project for UNIDO – United Nations Industrial Development Organization, in Vienna.

Dr. Veiga has held the position of Technical Advisor to Newlox Gold since the inception of the business and has been instrumental in developing the Company's environmentally and socially responsible gold production business. He has supported the Company with significant engineering assistance during two rounds of research and development at the University of British Columbia. Newlox continues to benefit from his strong connections to artisanal miners and governments established during his tenure at the United Nations.

2. Provide a general overview and discussion of the activities of management.

Management has been active during the period overseeing optimization and commercialization work being conducted at the Company's first artisanal tailings reclamation and reprocessing facility as well as evaluating expansion opportunities in Central and South America. Key management personnel were deployed to the field during the period to oversee optimization activities underway at the Issuer's operations as well as the implementation of Newlox's plan to re-start precious metals production and environmental remediation at Processing Plant 1.
