Trading Symbol - CSE: SLZ

SIGNIFICANT AIRBORN SURVEY COMPLETED EXPLORATION UPDATE

Slave Lake Zinc (“Slave Lake” or “the Company”) (CSE:SLZ) has now completed the data acquisition phase of the planned detailed airborne geophysical survey at the Company’s O’Connor Lake, NWT, exploration project.

The airborne magnetic and VLF EM survey was flown by the Company’s contractor, Precision Geophysics, at a line spacing of 50 meters using a helicopter-based geophysical system. A total of 880 line kilometers was flown covering the property’s structural control corridor.

Data processing and interpretation is underway with target recommendations for follow up ground-based exploration and drilling programs expected shortly.

Slave Lake Zinc’s O’Connor Lake property has had significant historical exploration work completed by a developer in the early 1950’s (as reported previously). At that time work included constructing a 45 kilometer winter access road, 62 drill holes totalling 4121 meters of core drilling and sinking of a three compartment shaft to 55 meters with a level established at 45 meters to access the vein. A 26.3 ton bulk sample sent to the Trail smelter graded 55.0% Pb, 13.5% Zn and 2.7 OPT Ag.

The Company is looking forward to sharing the compiled data with their “Collaboration Agreement” partners in the Northwest Territory Metis Nation in order to discuss its plans for further exploration at O’Connor Lake.

About Slave Lake Zinc

Slave Lake Zinc Corp. intends to develop the potential of its O’Connor Lake property, an historic zinc lead copper property located in the Northwest Territories of Canada. The property is located south of Great Slave Lake and to the east of Osisko Metals’ Pine Point project. The property was initially developed after the Second World War and subsequently abandoned in 1952 when the prices of zinc and lead collapsed post war. Slave Lake Zinc Corp. believes that it is well positioned to advance this project and to expand significantly the historic potential of the property. Forward Looking Statement

Statements in this news release that are forward-looking statements are subject to various risks and uncertainties concerning the specific factors disclosed here and elsewhere in both Slave Lake Zinc's periodic filings with Canadian securities regulators. When used in this news release, words such as "will", "plan", "estimate", "expect", "intend", "potential", "should," and similar expressions, are forward-looking statements. Information provided in this document is necessarily summarized and may not contain all available material information. Forward-looking statements include, without limitation, statements regarding the progress of a definitive offtake agreement, potential development and production at the Company's O'Connor lake project, future oriented events and other statements that are not facts. Forward-looking statements are based on a few assumptions and estimates that, while considered reasonable by management based on the business and markets in which Slave Lake Zinc operates, are inherently subject to significant operational, economic and competitive uncertainties and contingencies. Such forward-looking statements should therefore be construed in light of such factors. Although Slave Lake Zinc has attempted to identify important factors that could cause actual results, performance or achievements to differ materially from those contained in the forward-looking statements, there can be other factors that cause results, performance or achievements not to be as anticipated, estimated or intended. There can be no assurance that such information will prove to be accurate or that management's expectations or estimates of future developments, circumstances or results will materialize. Accordingly, readers should not place undue reliance on forward-looking statements. The forward-looking statements in this news release are made as of the date of this news release, and Slave Lake Zinc disclaims any intention or obligation to update or revise such information, except as required by applicable law, and Slave Lake Zinc does not assume any liability for disclosure relating to any other company herein.
