#### **Report on Business**

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

Ovation Science is an innovative drug development company with a high performance patented topical and transdermal delivery system called Invisicare® which enhances the delivery ingredients to and through the skin.

Using pharmaceutical drug development protocols and innovation, Ovation Science has developed topical and transdermal product formulations; all delivered by Invisicare®. Our technology and formulations are licensed to national and international companies that are branding experts that manufacture and market these products globally. Currently the Company is focusing on its unique DermSafe® hand sanitizer product due to unprecedented demand caused by the coronavirus (COVID-19) pandemic.

2. Provide a general overview and discussion of the activities of management.

Ovation has scaled up its ability to deliver DermSafe® by making major raw ingredient purchases in addition to ordering 1.5 million bottles which was paid in full from company funds. In order to increase our manufacturing capacity, we have selected additional manufacturers in the US and Canada. This will more than triple our current capacity and will allow the Company to have DermSafe® inventory manufactured and available for immediate shipment.

In addition with the approval of the sale of CBD topicals in Canada the Company is seeking a licensee and is also considering selling its products directly in the Canadian Market. The products would be manufactured in Canada for the Canadian market. With the introduction of the Farm Bill in the US CBD from Hemp is now legal in most States.

17. Discuss any trends, which are likely to impact the Issuer including trends in the Issuer's market(s) or political/regulatory trends.

In March 2020, the World Health Organization declared the recent outbreak of coronavirus, also known as "COVID-19", a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, has adversely affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. The impact on the Company is not currently fully determinable and management continues to monitor the situation.

For Ovation, COVID-19 has had both positive and negative effects on its business.

The Company's DermSafe product, which has completed studies verifying its ability to kill both bacteria and envelope viruses like H1N1 (swine flu) and H5N1 (bird flu). COVID-19 is also an envelope virus. The DermSafe product has seen a surge in demand. However materials like bottles, caps and raw ingredients are much harder to obtain because of the worldwide demand for these arising from the COVID-19 pandemic. There is also strong competition for these items as many traditional alcohol hand sanitizers use similar packaging.

Due to the mandatory closure of non-essential retail stores and dispensaries in the US there has been a significant decrease in sales in the cannabinoid market. The Company has seen a decrease in sales of the Ovation formulated Baskin CBD products that are sold in state licensed dispensaries.

The offset of DermSafe sales has more than made up for the slowdown in CBD product sales and the Company currently anticipates an overall increase in sales.
