Preferred Dental Technologies Inc. (“Company”) (CSE: PDTI, US OTC: PDTTF): EAS Custom Dental Abutment System Receives Positive Review from Industry Legend

Preferred Dental Implant Corp. recently received a very positive review from Dr. Gordon Christensen after he had the opportunity to analyze the merits of the EAS Custom Dental Abutment System, including the future plans we have for the system in the digital sector. This promising review is timely as the EAS System goes to market and continues to evolve and grow. It was Dr. Christensen’s early encouragement which motivated the founders to commercialize what had originally been customized handmade pieces offered as a premium lab service for solving individual complex dental implant cases.

It was during an in-person presentation with Dr. Christensen as well as presenting the first set of prototypes to him that he gave his initial opinion which was that: “It is a very impressive system and one that appears to have significant market potential.”

Due to this previous dialogue and with our sales team hitting the streets, we sought out Dr. Christensen’s opinion now that the system was finalized for mass production and with digital applications in development. In an email to PDTI, Dr. Christensen said: “It was my pleasure to look over your ingenious prosthodontic system. It is obvious that you have put significant time and effort into its development. It seems to be relatively simple and logical.”

We also asked Dr. Christensen if our sales representatives could disclose that his office recommended considering the EAS System. He continued: “Yes, you may tell labs that we have had the opportunity to observe the plans for your system, and they should compare it with whatever similar concept they are using.”

Dr. Gordon J. Christensen is Founder and CEO of Practical Clinical Courses (PCC) and Co-Founder and CEO for Clinicians Report Foundation (CR) and a practicing prosthodontist in Provo, Utah. PCC is an international continuing education organization that provides courses and videos for all dental professionals. CR offers unbiased research on thousands of dental products.

Dr. Christensen has presented over 45,000 hours of continuing education throughout the world and has published many articles and books. He is widely regarded as one of the world's leading authorities on dental implants.

Throughout the development cycle of the EAS System, management has had the support of industry leaders who have praised its usefulness and simplicity of design. We are pleased to see that someone of Dr. Christensen's caliber continues to see the merit and advantages provided by the EAS System, and these comments will be incorporated into our sales material to support our representatives.
