

PLANET VENTURES ACQUIRES 3.40669032 BITCOIN (BTC) FOR INITIAL CAD \$500,000 PURCHASE

- ***Company Deploys Excess Cash into Strategic Bitcoin Position***

Vancouver, BC – June 27, 2025 – *Planet Ventures Inc. (CSE: PXI; OTC: PNXPFF)* ("Planet Ventures" or the "Company"), an investment issuer focused on technology, mining and digital assets, is pleased to announce that it has completed its first purchase of **3.40669032 Bitcoin** for an aggregate purchase price of **\$500,000 CAD**, using a portion of its existing cash reserves.

This marks a pivotal first step in the Company's strategic plan to allocate a portion of its treasury into Bitcoin, the world's most secure and decentralized digital asset.

"This is a defining moment for Planet Ventures," said *Etienne Moshevich, CEO of Planet Ventures Inc.* **"With no need to raise capital, we're in the rare position of being able to deploy our excess cash into high-conviction, long-term opportunities — and we believe Bitcoin is one of the most asymmetric bets of our generation. Our goal is to enhance long-term shareholder value while positioning Planet at the forefront of the digital asset revolution."**

The Company intends to continue exploring further Bitcoin purchases as part of a disciplined capital allocation strategy, while maintaining a strong cash position and pursuing other high-growth investment opportunities in the tech, Ai, quantum and Web3 sectors.

This announcement follows the Company's previously stated intention to diversify its treasury strategy and reflects management's deep conviction in Bitcoin's long-term value proposition as a digital store of value and hedge against currency debasement.
