Premier Health Signs LOI with NexTech AR Solutions to Explore Healthcare Applications of Augmented Reality Technology

VANCOUVER, British Columbia, March 6, 2019 – Premier Health Group (CSE: PHGI, OTCQB: PHGRF, Frankfurt: 6PH) (the “Company” or “Premier Health”), a Company focused on developing innovative approaches that combine human skill-based expertise with emerging technologies for the healthcare industry, is pleased to announce it is working with NexTech AR Solutions (OTC: NEXCF)(CSE: NTAR) (FSE:N29) to explore bringing augmented reality technology to its patient centric healthcare app.

Premier Health will be working with NexTech to develop education tools for health care professionals and patients alike – some of which will be created and commercialized content for third parties. Utilizing AR as a learning tool in training healthcare professionals creates a highly engaging and immersive educational experience which aids in retention and how well complex concepts can be grasped. For patients, AR can potentially empower them to play a more proactive role in their own care through aiding in self-diagnosis. And finally, for third party content, the companies will explore topics such as education on medications for Pharma and Continuous Positive Airway Pressure (CPAP) therapy systems for Sleep Apnea Clinics.

In addition, the companies will investigate possible AR treatment delivery options. For example, in relation to physiotherapy, digital demonstrations can be mapped directly onto the movements patients perform as part of their recovery.

“At Premier Health we pride ourselves in being at the forefront of changes in healthcare, so we are thrilled to be a part of the future of healthcare by enabling state of the art technological advancements to our patient centric telemedicine app,” said Dr. Essam Hamza, CEO of Premier Health. “AR has the potential to revolutionize both the access to data and the delivery of healthcare. The technology will help doctors and patients alike – doctors will have access to the latest and most relevant information about their patients while patients can use AR for self-education and improving the quality of treatment they receive.”

“We are excited to work with the team at Premier Health to explore creating a custom AR and AI solution to address the healthcare market which represents another multi-billion dollar vertical ripe for disruption,” comments Evan Gappelberg CEO of Nextech. “AR allows medical knowledge, skills and expertise to be shared remotely in the moment, ensuring they get where they are needed most”.

ON BEHALF OF THE BOARD OF DIRECTORS

“Dr. Essam Hamza, MD”
Chief Executive Officer

About Premier Health

Premier Health is a Canadian company that is strategically poised to take advantage of business opportunities in the global health care industry. We are developing innovative health care approaches that combine human skill-based expertise with emerging technologies, with the goal of setting the gold standard for services in locations of interest worldwide. Premier Health's subsidiary, HealthVue is focused on developing proprietary technology to deliver quality healthcare through the combination of connected primary care clinics with telemedicine and artificial intelligence (AI). We currently have an ecosystem of over 100,000 active patients and have plans to rapidly increase that number both domestically and internationally. The Premier Health team has a strong track record of successfully creating value in healthcare and technology enterprises. The Management team has deep clinical, financial and operational expertise and a passion for improving healthcare for all patients.

About NexTech

NexTech is bringing a next generation web enabled augmented reality (AR) platform with Artificial Intelligence (AI) and analytics using a xAPI to the Cannabis industry, eCommerce, education, training, healthcare and video conferencing. Having integrated with Shopify, Magento and WordPress its technology offers eCommerce a universal 3D shopping solution. With just a few lines of embed code, the company's web-enabled patent-pending platform offers the most technologically advanced 3D-AR technology anywhere. Online retailers can subscribe to NexTech's state of the art, 3D-AR/AI solution for \$79/mo. The company has created the AR industries first end-to-end affordable, intelligent, frictionless, scalable platform.
