

QUADRON INTRODUCES "THE BEAST" - AN ETHANOL EXTRACTION SYSTEM

The BEAST can process up to 1,000 kg of Biomass Per Day

Vancouver, British Columbia, November 8, 2018 – Quadron Cannatech Corporation (the "Company" or "Quadron") – (CSE: QCC), is pleased to introduce its fully automated, touch screen control continuous flow Ethanol Extractor System, the "BEAST".

The BEAST is in its final stage of development and innovative engineering which culminated in this extraction system which can process massive amounts of biomass for the cannabis industry. The price of the BEAST, depending on the model and options, will range from \$1.5 million to \$2.25 million.

Some Key BEAST Advantages

- Compliant with GPP (Good Production Practices) and GMP (Good Manufacturing Practice);
- 3000L biomass feed hopper;
- Nitrogen biomass cooling with ERS (Energy Recovery Exchange);
- Continuous flow extraction with inline solvent recovery and surge storage;
- Equipped with proprietary "Crossflow" ethanol maximizer to operate within daily NFPA (National Fire Protection Association) ethanol limits;
- Advance filtration stacks;
- Designed with safety in mind, with safe ethanol requirements including an intrinsically designed sensory system.

Rosy Mondin, CEO of Quadron commented, "We are excited about the development of the BEAST, the first of its kind in Canada. The Beast is a high efficiency ethanol extraction system which represents the end result of extensive research and development. The Beast has the capability of providing licensed producers the ability to process extraordinary amounts of biomass per day."

Quadron Cannatech's portfolio of machines consists of the "BOSS" - a next generation Co2 cannabis extraction system that was built to simplify extraction with the benefits of automation and data analytics; and the Company's Mobile Extraction Module - state-of-the-art self-contained and fully portable extraction and processing laboratory. The Company is also preparing to commercially release several additional machines for the cannabis industry, including: a biomass dehydration system, a preparation and grinding unit, as well as an advanced filtration system.

The Company plans to have the BEAST available for delivery to customers in calendar Q2 2019.

About Quadron: Quadron provides equipment, products and service solutions for the authorized cannabis industry by providing a full array of end-to-end extraction and processing solutions, including sales of end user delivery options (such as vapor pens) for medical and recreational consumers.
