

AGRAFLORA ORGANICS INTERNATIONAL INC. and RELAY MEDICAL CORP.

JOINT NEWS RELEASE

AgraFlora Organics and Relay Medical Provides Update on Initial Technology Asset Transfer for Glow LifeTech Ltd.

Vancouver, British Columbia and Toronto, Ontario / April 8, 2019 – AgraFlora Organics International Inc. (“AgraFlora” or the “Company”) (CSE: AGRA) (Frankfurt: PU31) (OTCPK: PUFXF), a growth oriented and diversified international cannabis company, and **Relay Medical Corp.** (“Relay”) (CSE: RELA, OTCQB: RYMDF, Frankfurt: EIY2), a developer of MedTech innovation, jointly referred to as the “Partners”, are pleased to announce the execution of an asset sale agreement (“Agreement”) to transfer a suite of technology assets including the cannabis Smart Consumption System from Relay Medical Corp. to Glow LifeTech Ltd. (“Glow”).

The technology assets relate largely to the Smart Consumption System (“SCS”) currently being developed by Relay Medical to provide users and healthcare professionals with a medical grade, connected hardware/software product line to assist with effective management, storage, curation and consumption of cannabis related products. The storage product provides in-home secure, and environmentally controlled storage and guides dispensing and dosing for all cannabis delivery methods.

The system includes advanced management features for patient-caregiver interaction as well as an AI-driven engine, which can provide doctors and the pharmaceutical industry with valuable information on patient responses to cannabis products and to provide cannabis producers with market intelligence and the information to conduct post-market surveillance of their products.

“While there is a lot of focus and discussion around the growing recreational cannabis market there exists a clear gap in products, services, and technologies designed specifically for safe, consistent and responsible consumption of cannabis products. These concerns are especially clear within the healthcare sector where physicians and healthcare professionals are anxious or resistant to prescribe cannabis treatment due to the very wide and largely inconsistent quality control and dosage issues so common in the marketplace.” said Lahav Gil, CEO & Director, Relay Medical Corp. “We believe that by providing users and prescribing physicians with the products to effectively identify, and confidently consume medicinal and recreational cannabis products, we can encourage responsible use and significantly ease consumer tension.”

Glow Lifetech is currently a private company founded by the Partners in December 2018 (See press release dated December 20, 2018) to develop technologies to service the rapidly growing global cannabis sector. On April 4, 2019, the Partners jointly announced the signing of a binding letter of intent (“LOI”) to bring Glow public by way of reverse takeover (“Transaction”).

Under the terms of the agreement, Relay has sold a suite of technology assets relating to the development and licensing of cannabis related medical technologies. In consideration, Glow has issued 6,350,000 shares to Relay resulting in Relay holding approximately 63.5% of Glow prior to the anticipated completion of a private placement and go-public transaction.

Glow LifeTech Ltd.

Glow is a private company founded by Relay and AgraFlora in December 2018 to pursue technology opportunities in the global cannabis sector. The newly formed entity combines Relay's techno-commercial leadership with AgraFlora's accumulated knowledge, expertise and access to cannabis industries across the sector. Glow will benefit from Relay's infrastructure, technical leadership and business knowledge for the research, vetting, product development and validation of innovative technologies and AgraFlora will support the Company in the pursuit of technology opportunities in scientific validation, diagnostics, health & safety, screening, compliance and quality control/assurance within the cannabis industry.

About Relay Medical Corp.

Relay is an evolving "Integrated MedTech Accelerator" headquartered in Toronto, Canada, acquiring early-stage technologies and inventions, advancing and preparing them for pre-commercial acquisitions in the HealthTech marketplace. By integrating the funding, development and exit process into one organization led and managed by one expert team, Relay is building the capacity to accelerate and transact technologies with high efficiency and grow into a leading engine for MedTech innovation in the global HealthTech marketplace.
