

# FORM 7

## MONTHLY PROGRESS REPORT

Name of CNSX Issuer: **Renforth Resources Inc. (the “Issuer”)**

Trading Symbol: **RFR**

Number of Outstanding Listed Securities: **217,736,539**

Date: **August 4, 2020**

**Report on Business for month ending July 31, 2020.**

1. Provide a general overview and discussion of the development of the Issuer’s business and operations over the previous month. Where the Issuer was inactive disclose this fact.

- **July 2020 field work at New Alger. Completed a blasting and mini-bulk sample in the area of the Discovery Veins. The purpose of the blast was to create fresh rock for visual evaluation, assaying and if warranted by the assay results processing for the recovery of gold. The Blasting of the Discovery Veins surface gold mineralization, stripped over 275m within a known 500m strike length in the Pontiac sediments, which is still open. Renforth is now drilling on the Discovery Veins, within and outside of the stripped area.**
- **Commenced exploration on the Beaupré Copper/Silver Discovery on our wholly owned Malartic West Property**

**COVID has had little impact in the past month on Renforth’s operations.**

2. Provide a general overview and discussion of the activities of management.

**During the month Management:**

- **Managed items noted in #1, and continued general corporate operations**

3. Describe and provide details of any new products or services developed or offered. For resource companies, provide details of new drilling, exploration or production programs and acquisitions of any new properties and attach any mineral or oil and gas or other reports required under Ontario securities law.

**Results of June Field work:**

**Malartic West - visual confirmation of the presence of mineralization, noted historically, was obtained. This included sphalerite and minor chalcopyrite set within multiple felsic units, interlayered with narrow bands of graphitic shale. Also encountered were multiple bands of ultramafic rocks, including serpentinite and pyroxenites, these were historically investigated for their nickel content. Renforth’s investigation, and assay protocols, extends to testing for gold, nickel, copper, zinc and PGEs. With the exception of PGEs each of these metals was historically documented in various programs and locations within the system. The relationship**

between the felsic and ultramafic mineralization has not yet been determined. The southern claims, the focus of the work, hosted 3 areas of historic mineralization, in two bands approximately 4 kms apart (north-south) with a strike length of approximately 19 kms (east-west) between them, previously referred to as Lalonde, Victoria and Colonie. Renforth is the first company to consolidate all of these historic mineralized areas and approach them as a system. Renforth will, going forward, refer to this system as the Surimeau Project, separating the claims out of the Malartic West block.

- Parbec – obtained with prospecting was an extension of the Diorite Splay veining on surface, with additional veining uncovered and sampled, assay results pending. The structural interpretation of the mineralization in the sediments is continuing, sampling ended due to overburden beyond hand tool abilities in one direction and with the vein entering a fault in the other.

- Beep Mat - data was successfully acquired at both New Alger, in the area of the Discovery Veins, and at Parbec, in the area of the Diorite Splay. Some initial prospecting was also carried out with this data. A total of 19 channel samples were taken at various locations within the surveyed area. In the instance of the results given above the samples were taken from a quartz vein with chloritic and pyritic walls, which eventually plunged into a fault. These results line up with anomalies found in the survey, interpreted to extend this system to approximately 100m. In 2019 the southern “diorite” splay area, approximately 100 metres south of the Cadillac Break, was discovered to host narrow quartz veining on a ridge of sediments which assayed 1.03 g/t Au over 0.2m, this sample is interpreted to be the surface occurrence of mineralization seen in prior drillholes, with intersections at approximately 75m vertical depth of 2.82g/t Au over 1.0m in PAR-18-86, 2.35g/t Au over 3.3m in PAR-08-03 and at approximately 200m vertical depth 2.75g/t Au over 3.0m in PAR-08-02. This area, accessed via a trench corridor, was unable to be stripped due to access issues, and was not washed. As stated in 2019 we feel that this location is a key location in beginning to understand the true potential of mineralization in the sediments, it still has not been washed and is difficult to access from the north, future work will include attempting access from the south. Our recent beep mat work has given us proof of concept results at Parbec, this technology will also be used again in the future.

4. Describe and provide details of any products or services that were discontinued. For resource companies, provide details of any drilling, exploration or production programs that have been amended or abandoned.

**Not applicable.**

5. Describe any new business relationships entered into between the Issuer, the Issuer’s affiliates or third parties including contracts to supply products or services, joint venture agreements and licensing agreements etc. State whether the relationship is with a Related Person of the Issuer and provide details of the relationship.

**Not applicable.**

6. Describe the expiry or termination of any contracts or agreements between the Issuer, the Issuer's affiliates or third parties or cancellation of any financing arrangements that have been previously announced.

**Not applicable.**

7. Describe any acquisitions by the Issuer or dispositions of the Issuer's assets that occurred during the preceding month. Provide details of the nature of the assets acquired or disposed of and provide details of the consideration paid or payable together with a schedule of payments if applicable, and of any valuation. State how the consideration was determined and whether the acquisition was from or the disposition was to a Related Person of the Issuer and provide details of the relationship.

**None.**

8. Describe the acquisition of new customers or loss of customers.

**Not applicable.**

9. Describe any new developments or effects on intangible products such as brand names, circulation lists, copyrights, franchises, licenses, patents, software, subscription lists and trade-marks.

**Not applicable.**

10. Report on any employee hires, terminations or lay-offs with details of anticipated length of lay-offs.

**Not applicable.**

11. Report on any labour disputes and resolutions of those disputes if applicable.

**Not applicable.**

12. Describe and provide details of legal proceedings to which the Issuer became a party, including the name of the court or agency, the date instituted, the principal parties to the proceedings, the nature of the claim, the amount claimed, if any, if the proceedings are being contested, and the present status of the proceedings.

**Not applicable.**

13. Provide details of any indebtedness incurred or repaid by the Issuer together with the terms of such indebtedness.

**Not applicable.**

14. Provide details of any securities issued and options or warrants granted/expired.

**Renforth has completed a second closing of the previously announced financing with the issuance of 1,400,000 common share units, each unit priced at \$0.05 and consisting of one common share and one warrant to acquire an additional common share at a price of \$0.07 for a period of 24 months, and 2,500,000 flow through share units, each unit priced at \$0.055 and consisting of one share issued on a “flow-through” basis and one warrant to acquire an additional common share at a price of \$0.075 for a period of 24 months, for a total raised in this closing of \$207,500.**

15. Provide details of any loans to or by Related Persons.

**Not applicable.**

16. Provide details of any changes in directors, officers or committee members.

**None.**

17. Discuss any trends which are likely to impact the Issuer including trends in the Issuer’s market(s) or political/regulatory trends.

**The Issuer’s level of activity and expenditures during a specific quarter are influenced by the availability of working capital, the availability of additional external financing, the time required to gather, analyze and report on geological data related to mineral properties, the results of the Company’s prior exploration activities on its properties and the amount of expenditure required to advance its projects. There is no certainty in this industry that any expenditures on mineral exploration and development activities and/or programs will result in the discovery of an economic ore body.**

## Certificate of Compliance

The undersigned hereby certifies that:

1. The undersigned is a director and/or senior officer of the Issuer and has been duly authorized by a resolution of the board of directors of the Issuer to sign this Certificate of Compliance.
2. As of the date hereof there were is no material information concerning the Issuer which has not been publicly disclosed.
3. The undersigned hereby certifies to CNSX that the Issuer is in compliance with the requirements of applicable securities legislation (as such term is defined in National Instrument 14-101) and all CNSX Requirements (as defined in CNSX Policy 1).
4. All of the information in this Form 7 Monthly Progress Report is true.
