

FORM 7

MONTHLY PROGRESS REPORT

Name of CNSX Issuer: **Renforth Resources Inc. (the “Issuer”)**

Trading Symbol: **RFR**

Number of Outstanding Listed Securities: **251,296,662**

Date: **December 6, 2020**

Report on Business for month ending November 30, 2020.

1. Provide a general overview and discussion of the development of the Issuer’s business and operations over the previous month. Where the Issuer was inactive disclose this fact.
 - **On November 12, 2020, The Issuer announced the commencement of a drill program at Surimeau.**
 - **On November 24, 2020, The Issuer announced the completion of the drill program at Surimeau.**
 - **On November 12, 2020 and November 18, 2020, the Issuer announced an update on the Parbec drill program**

2. Provide a general overview and discussion of the activities of management.

During the month Management:

- **Managed items noted in #1, and continued general corporate operations**
3. Describe and provide details of any new products or services developed or offered. For resource companies, provide details of new drilling, exploration or production programs and acquisitions of any new properties and attach any mineral or oil and gas or other reports required under Ontario securities law.

Surimeau

November 12, 2020 - Surimeau drill program commencement - Renforth hired a mobile, track mounted drill, manned by an experienced driller/mechanic, along with a geologist, to carry out a day shift only drill program of a planned 1000m in length. Drill holes will be sited to undercut the Victoria West nickel – zinc – copper known mineralized trend, to obtain new mineralized intervals, fresh rock and a more complete picture of the mineralized trend than can be obtained by surface prospecting due to the limited amount of outcrop and its weathered condition. Historically parts of the Victoria trend were initially identified as a strong airborne conductor, follow up drilling done between the fifties and the seventies have identified a strong multi-kilometric zone of strong disseminated sulfides mineralization, without the ability to determine a genetic model. Renforth intends to apply an innovative exploration approach using our experienced geological team in order to advance the Surimeau Project.

November 24, 2020 Completion of the first drill test on Surimeau - This phase of drill test was performed using a small track mounted drill set up on existing forestry trails. Work has been temporarily concluded due to equipment breakage and weather issues, but not without producing noteworthy core intervals in relation to the polymetallic potential of the property. The drillholes completed targeted the historical Victoria nickel – zinc – copper showing but were collared east of the main worked area. In both holes SUR-20-001 and SUR-20-002, visual description identified intervals of strong stringers zones and disseminated sulfides, mainly pyrrhotite, on multiple intervals varying between 1 metres and 13 metres of core length. Overall, the sulfides bearing envelope makes respectively 26.5m and 60 metres for hole one and two which are located about 220 metres apart. Base metals sulfides such as sphalerite (zinc sulfide) and chalcopyrite (copper sulfide) were observed locally in association with pyrrhotite. Sulfides mineralization is hosted in varied lithologies, both sedimentary and volcanic. The strong structural layering suggests a remobilization of sulfides through deformation.

A third hole, which ended at 32m due to equipment breakdown, was designed to be the second hole in a four holes fence, this fence was designed to give a cross section of 300 metres (north/south) to cover a favorable lense of lithologies which caused a strong geophysical footprint centered on a strongly conductive graphitic mudstone layer. The intent of the ongoing program is to cover the entire thickness of the volcanic complex previously identified at Victoria, and understand the structure and associated alteration zoning to understand the distribution of metals, including gold. The core generated in this program has been logged and will be sampled, split core will be delivered to an assay laboratory with results reported on as available.

Parbec

Parbec Drill Program - Renforth is on pace to exceed the targeted 7000m in the current Phase I of the planned 15,000m total drill program at Parbec. Drilling will continue until Christmas break and resume in the New Year with the balance of the targeted 15,000m drilled in Q1 2021. These holes are infilling the 43-101 open pit resource model at Parbec, with some planned infill of historical 1980's drilling, as well as testing for down dip extension.

November 18, 2020 – the Issuer announced it received the balance of assays for drill hole PAR-20-100, and results for the top of hole PAR-20-10. See press release for details.

4. Describe and provide details of any products or services that were discontinued. For resource companies, provide details of any drilling, exploration or production programs that have been amended or abandoned.

Not applicable.

5. Describe any new business relationships entered into between the Issuer, the Issuer's affiliates or third parties including contracts to supply products or services, joint venture agreements and licensing agreements etc. State whether the relationship is with a Related Person of the Issuer and provide details of the relationship.

Not applicable.

6. Describe the expiry or termination of any contracts or agreements between the Issuer, the Issuer's affiliates or third parties or cancellation of any financing arrangements that have been previously announced.

Not applicable.

7. Describe any acquisitions by the Issuer or dispositions of the Issuer's assets that occurred during the preceding month. Provide details of the nature of the assets acquired or disposed of and provide details of the consideration paid or payable together with a schedule of payments if applicable, and of any valuation. State how the consideration was determined and whether the acquisition was from or the disposition was to a Related Person of the Issuer and provide details of the relationship.

None.

8. Describe the acquisition of new customers or loss of customers.

Not applicable.

9. Describe any new developments or effects on intangible products such as brand names, circulation lists, copyrights, franchises, licenses, patents, software, subscription lists and trade-marks.

Not applicable.

10. Report on any employee hires, terminations or lay-offs with details of anticipated length of lay-offs.

Not applicable.

11. Report on any labour disputes and resolutions of those disputes if applicable.

Not applicable.

12. Describe and provide details of legal proceedings to which the Issuer became a party, including the name of the court or agency, the date instituted, the principal parties to the proceedings, the nature of the claim, the amount claimed, if any, if the proceedings are being contested, and the present status of the proceedings.

Not applicable.

13. Provide details of any indebtedness incurred or repaid by the Issuer together with the terms of such indebtedness.

Not applicable.

14. Provide details of any securities issued and options or warrants granted/expired.

Not applicable

15. Provide details of any loans to or by Related Persons.

Not applicable.

16. Provide details of any changes in directors, officers or committee members.

Not Applicable.

17. Discuss any trends which are likely to impact the Issuer including trends in the Issuer's market(s) or political/regulatory trends.

The Issuer's level of activity and expenditures during a specific quarter are influenced by the availability of working capital, the availability of additional external financing, the time required to gather, analyze and report on geological data related to mineral properties, the results of the Company's prior exploration activities on its properties and the amount of expenditure required to advance its projects. There is no certainty in this industry that any expenditures on mineral exploration and development activities and/or programs will result in the discovery of an economic ore body.

Certificate of Compliance

The undersigned hereby certifies that:

1. The undersigned is a director and/or senior officer of the Issuer and has been duly authorized by a resolution of the board of directors of the Issuer to sign this Certificate of Compliance.
2. As of the date hereof there were is no material information concerning the Issuer which has not been publicly disclosed.
3. The undersigned hereby certifies to CNSX that the Issuer is in compliance with the requirements of applicable securities legislation (as such term is defined in National Instrument 14-101) and all CNSX Requirements (as defined in CNSX Policy 1).
4. All of the information in this Form 7 Monthly Progress Report is true.

Dated December 6, 2020
