CSE: RFR

Renforth Increases Parbec Contained Ounces of Gold by 28% in the Inferred category and 11% in the Indicated category with September 2018 Resource Estimate

Renforth Resources Inc. (CSE – RFR) (“Renforth” or the “Company”) is pleased to deliver to shareholders an updated September 2018 Resource Estimate for Parbec consisting of an inferred 656,875 oz Au and an indicated 37,224 oz Au. This increase to the resource estimate is the result of positive drill results obtained in 25 holes over 5600.8 m in the last 10 months.

September 2018 Parbec Resource Estimate

Version	Tonnage t	Grade g/t Au	Contained Ounces
2018 (Inferred)	9,659,636	2.33	656,875
2018 (Indicated)	368,105	3.47	37,224
2016 (Inferred)	7,256,872	2.01	514,108
2016 (Indicated)	263,230	3.62	33,592
Inferred % Increase	33.11%	15.99%	27.77%
Indicated % Increase	39.84%	-4.22%	10.81%

September 2018 Resource Estimate Parameters

(a) 50m search radius used for tonnage polygon construction

(b) Assays are raw, uncomposited, uncapped

(c) Lower cutoff of 0.50g/t Au applied to calculated intervals

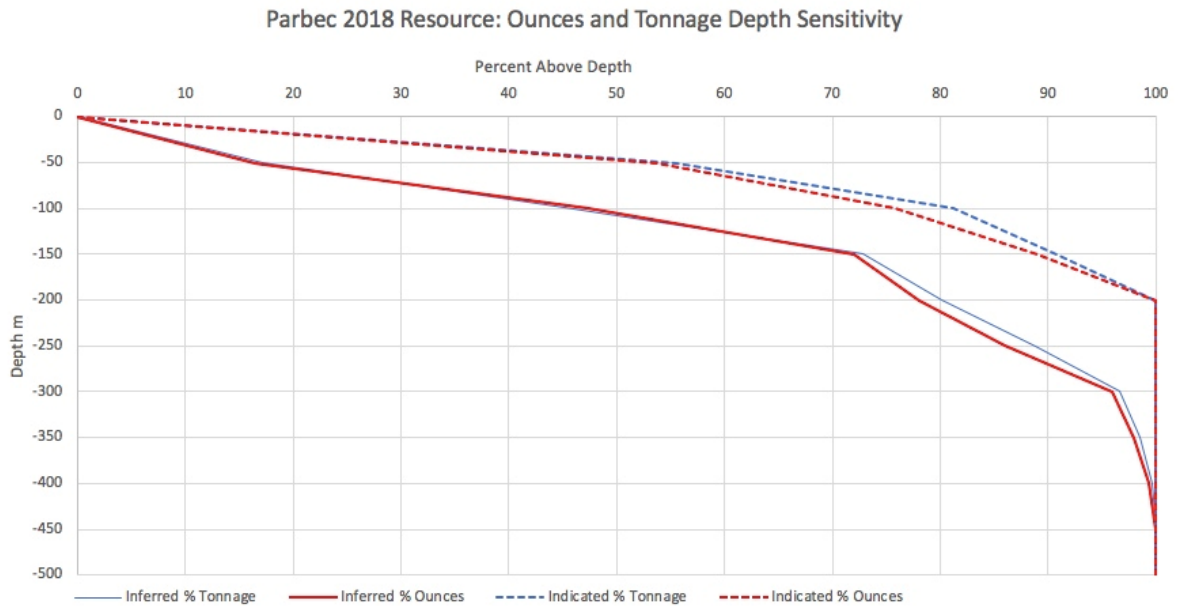

(d) Density of 2.8t/m³ used for tonnage calculations

(e) Core-width intervals used for tonnage calculations

“I am pleased that Renforth is able to deliver to shareholders this value increase to our asset. Despite the general lack of interest in the junior exploration market we have been able to fund our exploration plan and update our resource, acquiring the additional 146,399 contained ounces of gold at an “all-in” exploration cost below \$9 CAD/ounce. I hope shareholders take comfort in this demonstration of our efficient use of shareholder capital. I personally believe that focusing on growing our assets where we can, cost-effectively, in this market where junior exploration is largely overlooked, will benefit Renforth once gold ounces are desired” states Nicole Brewster, President & CEO of Renforth.

Mineralization at Parbec is at surface, down to a current maximum vertical depth of 738m, the deepest point included within the resource estimate is at a depth of 440m. With a few exceptions the bulk of the drilling at Parbec can be considered relatively shallow, resulting in a resource that is currently shallow but open at depth, offering the potential to add ounces with successful deeper drilling. In addition to being open at depth the mineralization is also open along strike, approximately 700m of interpreted surface strike of the mineralized structure remains on the Parbec property to be drilled.

The following graph illustrates that approximately 80% of the ounces and tonnage contained in the September 2018 Resource Estimate are located above a depth of 200m.

September 2018 Parbec Resource Estimate Cut Off Grade Sensitivity

Resource Estimate Category	Cutoff Grade	Tonnage	Grade (g/t)	Oz Au
2018 Inferred	0.5	9,589,852	2.34	655,644
2018 Inferred	0.75	8,596,163	2.53	634,553
2018 Inferred	1	7,164,688	2.82	589,306
2018 Inferred	1.25	5,538,203	3.25	524,589
2018 Inferred	1.5	3,958,126	3.88	448,101
2018 Inferred	1.75	3,400,715	4.19	415,553
2018 Inferred	2	2,800,356	4.60	376,119
2018 Inferred	2.25	2,451,150	4.89	349,638
2018 Inferred	2.5	2,156,716	5.16	324,563
2018 Inferred	2.75	1,632,459	5.80	276,045
2018 Inferred	3	1,550,765	5.92	267,890
2018 INDICATED	0.5	368,105	3.47	37,224
2018 INDICATED	0.75	364,699	3.49	37,137
2018 INDICATED	1	347,881	3.61	36,632
2018 INDICATED	1.25	288,730	4.06	34,207
2018 INDICATED	1.5	225,532	4.75	31,247
2018 INDICATED	1.75	173,281	5.61	28,364
2018 INDICATED	2	167,536	5.73	27,986
2018 INDICATED	2.25	167,536	5.73	27,986
2018 INDICATED	2.5	114,650	7.11	23,783
2018 INDICATED	2.75	95,262	7.91	21,976
2018 INDICATED	3	79,631	8.80	20,450

The table above is included to demonstrate the effect of raising the cut-off grade above the 0.5 g/t used in the September 2018 Resource Estimate. As seen the tonnage meeting the higher cut-off grade

decreases, resulting in fewer ounces within that tonnage with a higher grade than the 2018 Resource Estimate stated.

With the release of this resource update Renforth will, as previously announced, commence non-brokered fundraising efforts through the issuance of units on a common or flow-through share basis. These units will be priced at \$0.05 with a full warrant exercisable at \$0.10 for 24 months from closing and at \$0.06 with a half warrant exercisable at \$0.12 for 18 months from closing respectively. The amount to be raised will depend upon market conditions, at a minimum Renforth would look to raise \$250,000, as this amount is sufficient for a drill program at Parbec.

A technical report supporting this resource estimate update will be filed on SEDAR once available.

Technical Information in this press release has been reviewed and approved by Francis Newton P. Geo, a “qualified person” pursuant to the guidelines of 43-101.
