Renforth Completes Parbec Payments, Update on Current Drilling

Renforth Resources Inc. (CSE – RFR) (“Renforth” or the “Company”) is pleased to announce that the final cash payment (\$200,000 CAD) and final share issuance (250,000) required under the terms of Renforth’s 100% option on the Parbec Property, located in Malartic Quebec, contiguous to the Canadian Malartic Mine, have been made. Renforth has until January 2020 to complete the work required on the property, there is currently a drill program underway, as announced January 23 2019. The current program is expected to complete the third hole today, with approximately 950m drilled to date. General details of the current program are as follows;

PAR-19-95

Target – a step out to the east from prior drilling test strike extensions of the gold bearing Discovery Zone porphyries and magnetic diorite occurrences.

Result – the targeted lithologies are observed in the drill core, total length 252m

PAR-19-96

Target – this was an exploratory step out to the east of ~150m from PAR-19-95 targeting the Cadillac Break

Result – this hole intersected several porphyries interbedded with sediments carrying pyrite stringers that follow joints and shears within the porphyry, and pyrite clots within pegmatitic vein zones, total length 306m

PAR-19-97

Target – the depth extension of the gold bearing #2 Zone diorites

Result – this hole has successfully intersected the down-dip extension of the targeted diorite zone, as well as a number of wide weakly silicified zones and narrow “magnetic diorite” type zones. In addition, the hole intersected an interesting tuff zone further north than expected, once the contact with the volcanics to the north is reached this hole will terminate, anticipated to be today. The hole is at a current length of 399m

The core from this program is being logged, samples selected will be cut, bagged and tagged and delivered for assay. Once available results will be press released.

Brian H. Newton P.Geo, a “qualified person”, has read and approved the technical disclosure in this press release.
