The accompanying notes are an integral part of these condensed interim financial statements.

1. NATURE AND CONTINUANCE OF OPERATIONS

Atlantic Resources Inc. (the "Company") was incorporated in the State of Nevada on February 9, 2007 and is in the exploration stage. On January 14, 2015, the Company merged its wholly-owned subsidiary, Rise Resources Inc., a Nevada corporation, in and to the Company to effect a name change from Patriot Minefinders Inc. to Rise Resources Inc. Rise Resources Inc. was formed solely for the purpose of effecting the change of name.

On February 16, 2015, the Company increased its authorized capital from 21,000,000 shares to 400,000,000 shares.

On January 29, 2016, the Company completed an initial public offering in Canada and began trading on the Canadian Securities Exchange ("CSE") on February 1, 2016.

The Company is in the early stages of exploration and as is common with any exploration company, it raises financing for its acquisition activities. The accompanying financial statements have been prepared on the going concern basis, which presumes that the Company will continue operations for the foreseeable future and will be able to realize assets and discharge liabilities in the normal course of business. The Company has incurred a loss of \$489,132 for the period ended April 30, 2016 and has accumulated a deficit of \$1,693,154. This raises substantial doubt about the Company's ability to continue as a going concern. The ability of the Company to continue as a going concern is dependent on the Company's ability to raise additional capital and implement its business plan, which is typical for a start-up company. The financial statements do not include any adjustments that might be necessary if the Company is unable to continue as a going concern.

Management of the Company ("management") is of the opinion that sufficient financing will be obtained from external financing and further share issuances to meet the Company's obligations. At April 30, 2016, the Company had working capital of \$136,471.

2. BASIS OF PREPARATION

Generally Accepted Accounting Principles

The accompanying unaudited condensed interim financial statements have been prepared in conformity with generally accepted accounting principles of the United States of America ("US GAAP") and the rules and regulations of the Securities and Exchange Commission ("SEC") for financial information with the instructions to Form 10-Q and Regulation S-K. Results are not necessarily indicative of results which may be achieved in the future. The unaudited condensed interim financial statements should be read in conjunction with the Company's Annual Report on Form 10-K, which contains the audited financial statements and notes thereto, together with Management's Discussion and Analysis, for the year ended July 31, 2015. Certain information and footnote disclosures normally included in the financial statements prepared in accordance with US GAAP have been condensed or omitted pursuant to such SEC rules and regulations.

Change in Functional and Presentation Currency

The Company's expenses and overheads are now primarily being incurred in Canadian Dollars ("CAD") and it is anticipated that cash flows will continue to be primarily in CAD. Accordingly, the Company determined that effective August 1, 2015, the functional currency of the Company would change from the United States Dollar ("USD") to CAD.

RISE RESOURCES INC.
(An Exploration Stage Company)
NOTES TO THE FINANCIAL STATEMENTS
FOR THE PERIOD ENDED APRIL 30, 2016
(Expressed in Canadian Dollars)
(Unaudited)

2. BASIS OF PREPARATION (continued)

Change in Functional and Presentation Currency (continued)

Effective August 1, 2015, the Company also changed its presentation currency from USD to CAD. As a result of changing the presentation currency, all the comparative assets and liabilities were translated using the closing rate at the balance sheet date, comparative equity were translated at the exchange rates at the dates of transaction and the statements of loss were translated at the average exchange rate for the period covered. All resulting change differences are recognized in the accumulated deficit in the balance sheets shareholders equity (deficiency) section. A change in presentation currency is accounted for as a change in accounting policy and is applied retrospectively, as if the new presentation currency had always been the presentation currency. Consequently, the comparatives for the year ended July 31, 2015 and as at July 31, 2015 have been restated to be presented in CAD. The exchange rates applied for translation purposes were as follows:

Date or period	Exchange rate
As at July 31, 2015	1 CAD = 0.7703 USD
For the year ended July 31, 2015	1 CAD = 0.8403 USD
For the six month period ended January 31, 2015	1 CAD = 0.8807 USD

Recently Adopted and Recently Issued Accounting Standards

In August 2014, the FASB issued ASU No. 2014-15, "Presentation of Financial Statements - Going Concern (Subtopic 205-40): Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern". This ASU provides guidance on determining when and how to disclose going concern uncertainties in the financial statements. The new standard requires management to perform interim and annual assessments of an entity's ability to continue as a going concern within one year of the date the financial statements are issued. An entity must provide certain disclosures if "conditions or events raise substantial doubt about the entity's ability to continue as a going concern." The ASU applies to all entities and is effective for annual periods ending after December 15, 2016, and interim periods thereafter, with early adoption permitted. The Company is currently evaluating the impact of adoption of this standard.

In November 2015, the FASB issued ASU No. 2015-17, "Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes". This ASU eliminates the current requirement to present deferred tax assets and liabilities as current and noncurrent amounts in a classified balance sheet and replaces it with a noncurrent classification of deferred tax assets and liabilities. The ASU applies to all entities and is effective for annual periods beginning after December 15, 2017, and interim periods thereafter, with early adoption permitted. The Company is currently evaluating the impact of adoption of this standard.

In January 2016, the FASB issued ASU No. 2016-01, "Financial Instruments - Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Liabilities". This ASU amendment addresses aspects of recognition, measurement, presentation and disclosure of financial instruments. It affects investments in equity securities and the presentation of certain fair value changes for financial liabilities measured at fair value, and simplifies the impairment assessment of equity investments without a readily determinable fair value by requiring a qualitative assessment. The ASU applies to all entities and is effective for annual periods beginning after December 15, 2017, and interim periods thereafter, with early adoption permitted. The Company is currently evaluating the impact of adoption of this standard.

Other than the above, the Company has determined that other significant newly issued accounting pronouncements and are either not applicable to the Company's business or that no material effect is expected on the financial statements as a result of future adoption.

2. BASIS OF PREPARATION (continued)

Use of Estimates

The preparation of condensed interim financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates. Significant areas requiring the use of estimates include the valuation allowance applied to deferred income taxes and valuation of agent warrants. Actual results could differ from those estimates, and would impact future results of operations and cash flows.

3. MINERAL PROPERTY OPTION

Title to Mineral Properties

Title to mineral properties involves certain inherent risks due to the difficulties of determining the validity of certain mineral titles as well as the potential for problems arising from the frequently ambiguous conveying history characteristic of many mineral properties. As at April 30, 2016, the Company does not hold titles to any mineral properties.

Indata, British Columbia

On May 18, 2015, the Company entered into an option agreement with Eastfield Resources Ltd., a British Columbia company with its common shares listed for trading on the TSX Venture Exchange under the symbol "ETF" (Eastfield), pursuant to which Eastfield granted the Company the exclusive and irrevocable right to acquire up to a 75% interest in and to certain claims in the Indata property located in the Omineca Mining Division in British Columbia, Canada. In order to earn the initial 60% interest, the Company is required to pay Eastfield an aggregate of \$350,000 (\$50,000 paid) in cash and incur a minimum of \$2,000,000 in aggregate exploration expenditures on the property by April 3, 2019. In order to earn the additional 15% interest, the Company is required to pay Eastfield \$100,000 cash within 90 days of earning the 60% interest and incur a further \$500,000 in aggregate annual exploration expenditures on the property until such time as the Company is able to complete a feasibility study on the property. As at April 30, 2016, the Company has incurred cumulative exploration expenditures of \$5,000 on the Indata property.

4. CONTINGENCY

During the year ended July 31, 2014, the Company entered into a binding letter of intent ("LOI") with Wundr Software Inc. ("Wundr"). Under the terms of the LOI, the Company would acquire 100% of the issued and outstanding common shares of Wundr. Due to unforeseen circumstances, the Company did not complete the transactions contemplated in the LOI, which the Company announced had expired on January 10, 2014.

On September 17, 2014, the Company learned that it was the subject, along with a number of additional defendants, of a notice of civil claim (the "Claim") filed in the Supreme Court of British Columbia by Wundr, under which Wundr is seeking general damages from the Company as well as damages for conspiracy to cause economic harm. None of the allegations contained in the Claim have been proven in court. Management has determined that the probability of the Claim resulting in an unfavourable outcome and financial loss to the Company is unlikely.

5. SHARE EXCHANGE AGREEMENT AND LOAN RECEIVABLE

Description of Business

We are a mineral exploration company with a copper/gold property under option. Our common stock is currently traded on the OTC Markets under the symbol **RYESö**, and listed on the Canadian Securities Exchange (the **CSEö**) under the symbol **UPPö**. We ceased to be a US Issuer on February 2, 2016.

On May 18, 2015, we entered into an option agreement (the **Option Agreementö**) with Eastfield Resources Ltd., a British Columbia company with its common shares listed for trading on the TSX Venture Exchange under the symbol **ETFö** (**Eastfieldö**), pursuant to which Eastfield granted us the exclusive and irrevocable option to acquire up to a 75% undivided interest in and to certain mineral claims known as the Indata property located in the Omineca Mining Division in British Columbia, Canada (the **Indata Propertyö**). In order to earn the initial 60% interest, we are required to pay Eastfield an aggregate of \$350,000 in cash and incur a minimum of \$2,000,000 in aggregate exploration expenditures on the Indata Property by April 3, 2019. In order to earn the additional 15% interest, we are required to pay Eastfield \$100,000 within 90 days of earning the 60% interest and incur a further \$500,000 in aggregate annual exploration expenditures on the Indata Property until such time as we are able to complete a feasibility study on the Property. Upon the completion of a feasibility study, the additional 15% interest will be deemed to have been earned.

Prior to entering into the Option Agreement, we were a development stage company engaged in exploring and evaluating potential strategic transactions in multiple industries, including but not limited to mineral properties and technology.

On May 31, 2016, we entered into an agreement with Klondike Gold Corp. (**Klondikeö**) regarding the purchase of a portfolio of seven gold and base metal properties in southeast British Columbia consisting of 150 mining claims with a total area of 28,000 hectares. Under the agreement, within 60 days of signing, we are required to pay Klondike \$50,000 in cash, issue 1,500,000 common shares, and issue 1,500,000 warrants. On the one year anniversary of the first closing, we are required to pay Klondike \$150,000 in cash, issue 2,000,000 common shares of the Company, and issue 1,000,000 warrants. Klondike will retain a 2% net smelter return royalty and we will have the right to purchase 50% of this royalty for \$1,000,000 at any time after the first closing. Each of the warrants is exercisable for a period of two years into one common share of Rise at a price that is a 20% premium to the 10-

day volume-weighted average price of the stock on the Canadian Securities Exchange immediately prior to the date of issuance.

Plan of Operations

As at April 30, 2016, we had a cash balance of \$267,763, compared to a cash balance of \$18,000 as of July 31, 2015.

Our plan of operations for the next 12 months is to carry out the first of a two-phase exploration program on the Indata Property at a total cost of approximately \$304,610, as follows:

Phase I: Line Cutting, Mapping, Geophysical and Geochemical Surveys

Description	Amount (\$)
Field supervision / mapping (fees)	40,800
Field supervision room & board expenses	19,125
Line cutting (including personnel costs, room & board and vehicle expenses)	84,600
Field supervision / sampling (fees)	13,600
Soil sampling (including personnel costs, room & board and vehicle expenses)	9,180
Soil and rock sample analysis	20,000
IP and magnetics survey	68,000
Geophysical surveying costs (including room & board and vehicle expenses)	24,800
Reporting and drafting	10,000
Contingency	14,500
Total	304,605

The first phase will provide the information needed to determine drill targets, if any, for the second phase. We expect to complete the second phase of the exploration program by November 30, 2017, as follows:

Phase II: Drilling Program

Description	Amount (\$)
Drilling costs	160,000
Site preparation	10,000
Sample analysis	10,000
Geologist / supervisor (fees)	30,000
Field crew (fees)	12,000
Field crew expenses (including room & board, vehicle expenses and equipment expenses)	38,000
Data compilation / report preparation	10,000
Contingency	13,500
Total	283,500

We are currently evaluating the seven southeast British Columbia properties that we intend to purchase from Klondike. An exploration program will be compiled based on the findings from this evaluation.

In addition to the two phase program and future work on the southeast British Columbia properties, we anticipate spending approximately \$137,500 on general operating expenses, including fees payable in connection with our filing obligations as a reporting issuer in Canada, as follows:

Description	Amount (\$)
Consulting fees	72,000
Professional fees	17,500
Filing and regulatory expenses	5,500
Rent	12,000
Marketing and website development expenses	9,000
General and administrative expenses	21,500
Total	137,500

We do not currently have sufficient funds to carry out the two-phase exploration program or cover our anticipated general operating expenses for the year, so we will require additional funding. We anticipate that additional funding will be in the form of equity financing from the sale of our common stock or from loans from one of several directors or officers, or companies controlled by directors or officers. We do not have any arrangements in place for any future equity financing or loans, and if we are not successful in raising additional financing, we anticipate that we will not be able to proceed with our business plan.

During the year ended July 31, 2015, we entered into debt conversion agreements with a total of 20 investors pursuant to which such investors agreed to convert an aggregate of \$647,657 in debt into 31,504,677 shares of our common stock at a price of \$0.02 per share, and completed a non-brokered private placement, issuing an aggregate of 6,000,002 shares of our common stock to six investors at a price of \$0.035 per share for gross proceeds of \$210,000. Of the 31,504,677 shares issued, 13,000,186 were cancelled during the period ended April 30, 2016. On January 29, 2016, we completed an initial public offering, issuing an aggregate of 6,050,000 shares of common stock at a price of \$0.10 per share for gross proceeds of \$605,000. On February 1, 2016, our common stock commenced trading on the CSE.

We anticipate incurring operating losses for the foreseeable future. We base this expectation, in part, on the fact that very few mineral claims in the exploration stage ultimately develop into producing, profitable mines. Our future financial results are also uncertain due to a number of factors, some of which are outside our control. These factors include the following:

- our ability to raise additional funding;
- the market price for any minerals that may be discovered on the Property;
- the results of our proposed exploration program on the Property.

We have not attained profitable operations and are dependent upon obtaining financing to pursue our proposed exploration activities. For these reasons our auditors believe that there is substantial doubt that we will be able to continue as a going concern.

Results of Operations

For the Nine Months Ended April 30, 2016 and 2015

Our operating results for the nine month periods ended April 30, 2016 and 2015 are summarized as follows:

We expect to operate at a loss for at least the next 12 months. We have no agreements for additional financing and cannot provide any assurance that additional funding will be available to finance our operations on acceptable terms in order to enable us to carry out our business plan. There are no assurances that we will be able to complete further sales of our common stock or any other form of additional financing. If we are unable to achieve the financing necessary to continue our plan of operations, then we will not be able to carry out any exploration work on the Indata Property and our business may fail.

Off Balance Sheet Arrangements

We do not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Not applicable.

ITEM 4. CONTROLS AND PROCEDURES.

Disclosure Controls and Procedures

The Securities and Exchange Commission (the "SEC") defines the term "disclosure controls and procedures" to mean controls and other procedures of an issuer that are designed to ensure that information required to be disclosed in the reports that it files or submits under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Exchange Act is accumulated and communicated to the issuer's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure. The Company maintains such a system of controls and procedures in an effort to ensure that all information which it is required to disclose in the reports it files under the Exchange Act is recorded, processed, summarized and reported within the time periods specified under the SEC's rules and forms and that information required to be disclosed is accumulated and communicated to its principal executive and principal financial officers to allow timely decisions regarding disclosure.

As of the end of the period covered by this Report, the Company carried out an evaluation, under the supervision and with the participation of its Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of its disclosure controls and procedures. Based on this evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that its internal control over financial reporting was not effective as of April 30, 2016 because the following material weakness in internal control over financial reporting existed as of that date:

- (i) lack of segregation of incompatible duties due to insufficient personnel.

A material weakness is a deficiency or a combination of control deficiencies in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of annual or interim financial statements will not be prevented or detected on a timely basis.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting during the period ended April 30, 2016 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

On September 17, 2014, we learned that we were the subject, along with a number of additional defendants, of a notice of civil claim (the "Claim") filed in the Supreme Court of British Columbia by Wundr Software Inc. ("Wundr"), an eBook software developer. We were formerly a party to a binding letter of intent with Wundr that was announced on November 12, 2013 (the "Wundr LOI"), pursuant to which we proposed to acquire 100% of the outstanding shares of Wundr. On January 10, 2014, we reported that the Wundr LOI had expired.

Among other things, the Claim alleges that we committed the tort of intentional interference with economic or contractual relations by virtue of our role in an alleged scheme to establish a competing business to Wundr, and that we, through our agents, breached the terms of the Wundr LOI by appropriating certain confidential information and intellectual property of Wundr for the purpose of establishing a competing business. The Claim also alleges that we are vicariously liable for the actions of our agents.

Wundr is seeking general damages from us as well as damages for conspiracy to cause economic harm. None of the allegations contained in the Claim have been proven in court, we believe that they are without merit, and we therefore intend to vigorously defend our position against Wundr.

Other than as described above, we are not aware of any material pending legal proceedings to which we are a party or of which the Property is the subject. We also know of no proceedings to which any of our directors, officers or affiliates, or any registered or beneficial holders of more than 5% of any class of our securities, or any associate of any such director, officer, affiliate or security holder are an adverse party or have a material interest adverse to us.
