

MONTHLY PROGRESS REPORTName of Listed Issuer: **Sassy Resources Corporation** (the "Issuer").Trading Symbol: **SASY**Number of Outstanding Listed Securities: **47,256,256**Date: **July 7, 2021**

This Monthly Progress Report must be posted before the opening of trading on the fifth trading day of each month. This report is not intended to replace the Issuer's obligation to separately report material information forthwith upon the information becoming known to management or to post the forms required by Exchange Policies. If material information became known and was reported during the preceding month to which this report relates, this report should refer to the material information, the news release date and the posting date on the Exchange website.

This report is intended to keep investors and the market informed of the Issuer's ongoing business and management activities that occurred during the preceding month. Do not discuss goals or future plans unless they have crystallized to the point that they are "material information" as defined in the Policies. The discussion in this report must be factual, balanced and non-promotional.

General Instructions

- (a) Prepare this Monthly Progress Report using the format set out below. The sequence of questions must not be altered nor should questions be omitted or left unanswered. The answers to the items must be in narrative form. State when the answer to any item is negative or not applicable to the Issuer. The title to each item must precede the answer.
- (b) The term "Issuer" includes the Issuer and any of its subsidiaries.
- (c) Terms used and not defined in this form are defined or interpreted in Policy 1 – Interpretation and General Provisions.

Report on Business

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

See Item 2 below for a complete overview and discussion of the Issuer's activities for the month of June 2021.

2. Provide a general overview and discussion of the activities of management.

On June 3, 2021, the Issuer announced that, further to its news release of May 28, 2021, it has closed a non-brokered private placement (the "Private Placement") in its subsidiary, Gander Gold Corporation ("Gander Gold"), including an additional strategic investment by Mr. Eric Sprott in the amount of \$1,600,000 which brings Mr. Sprott's ownership position in Gander Gold (on conversion of special warrants) to 17.35%.

The Private Placement of 11,000,000 convertible special warrants, issued at a price of \$0.20 per special warrant, generated net proceeds of \$2,200,000. The special warrants will be converted into common shares of Gander Gold at a date to be determined by the board of directors of Gander Gold, but no later than two weeks after Gander Gold becomes a reporting issuer.

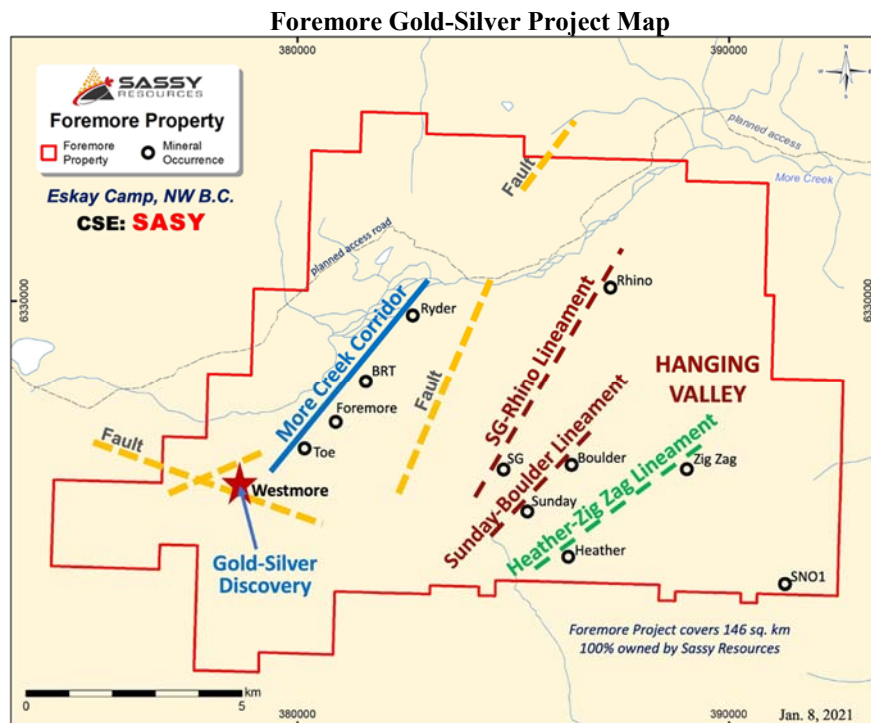

To date, Gander Gold has raised \$5,001,208 through the issuance of convertible special warrants and common shares with no finder's fees.

On June 11, 2021, the Issuer announced that announce that as exploration crews prepared to follow-up on last fall's gold-silver discovery in first-ever drilling at the Westmore target, in the southwest corridor of the Issuer's 100%-owned Foremore Project in Northwest B.C.'s Eskay Camp, a geochronology study completed by Dr. Kevin Chamberlain at the University of Wyoming has put the

mineralizing event at Westmore within the same geological timeline as other deposits in the district and elsewhere in the broader Golden Triangle.

Highlights:

- 189.6 Ma is the interpreted age of the Westmore granodiorite intrusive, meaning it was part of a major Early Jurassic magmatic event that was also responsible for the epithermal gold mineralization at Brucejack, Snip, Red Mountain and Spectrum, and porphyry mineralization at KSM;
- The gold-bearing quartz veins from the Westmore discovery zone contain galena that overlaps in composition with the field of Jurassic-aged galena from the Eskay Creek mine, and these veins cross-cut the 189.6 Ma Westmore granodiorite;
- Age-dating of targets within the multi-km-long More Creek VMS system and the under-explored Hanging Valley area further to the east confirms the Foremore Property experienced at least two separate periods of mineralizing events ahead of the Westmore zone (~327 Ma for More Creek and ~377 Ma for the Hanging Valley). This helps explain the very distinct styles of mineralization at Foremore and will help guide geologists in their modeling of new discovery opportunities.
