- Discuss any trends which are likely to impact the Issuer including trends in the Issuer's market(s) or political/regulatory trends.

The COVID-19 Pandemic will likely have a minimal impact on the Company's activities, most notably in curtailment of travel and access to mineral projects due to travel and social distancing restrictions.

The Issuer is a public junior mining issuer involved in exploration activities and is subject to the market fluctuations and volatility experienced by junior exploration and development issuers in British Columbia and world- wide in recent years.

Resource exploration and development is a speculative business, characterized by a number of significant risks. The long-term profitability of the Issuer's operations will in part be directly related to the costs and success of its exploration programs.

Metal prices have fluctuated widely, particularly in recent years. Consequently, the economic viability of any of the Issuer's exploration projects cannot be accurately predicted and may be adversely affected by fluctuations in mineral prices.
