About St-Georges

St-Georges is developing new technologies to solve the mining industry's biggest environmental problems. If successful, these new technologies would improve the financial bottom line of current mining producers and upgrade certain current known metal resources to economic status while addressing environmental and social acceptability issues.

The Company controls directly or indirectly all of the active mineral tenures in Iceland; it explores for nickel on the Julie Nickel Project , for industrial minerals on Quebec's North Shore,

and for lithium and rare metals in Northern Quebec and in the Abitibi area. Headquartered in Montreal, St-Georges' stock is listed on the CSE under the symbol SX, on the US OTC under the Symbol SXOOF and on the Frankfurt Stock Exchange under the symbol 85G1.
