Report on Business

1. Provide a general overview and discussion of the development of the Issuer’s business and operations over the previous month. Where the Issuer was inactive disclose this fact.

Sasquatch Resources Corp. is a mineral exploration company primarily focused on reclamation of waste rock, both at legacy mine sites and in areas where logging roads have encountered and been constructed with

significant volumes of mineralized material. In many cases, waste rock at such sites is easily accessible, occurs in significant volumes, and can contain potentially economic grades of copper, gold, silver and other valuable minerals. Removing the high-sulphide material from the waste at these sites (which includes both valuable minerals but also potentially harmful elements such as sulphur, lead and arsenic) can often be effectively done through a relatively simple ore-sorting process, and the high-sulphide material can be removed from the site and sold to an existing end processor. This process can allow the Company to address environmental and other hazards while adding critical minerals and other valuable elements to the supply chain, all while minimizing the need to add new mines and/or mining infrastructure. To this end, the Company has acquired and is assessing a number of project areas that have waste rock potential, including the Mount Sicker Property in southern Vancouver Island, British Columbia, the Blue Grouse Property, located about 30km from the Mount Sicker Property on the south side of Lake Cowichan, the Santana Property (the area known as the former Santana mine) on Quadra Island, British Columbia, the Port Alberni Claim Group (including Lucky Strike, Star of the West, B & K, Golden Dome and Golden Eagle) about 90km from Mount Sicker, and the Slesse Property near Chilliwack, British Columbia.
