About SPARC AI Inc.

SPARC AI is a defence technology company solving one of the most critical challenges in modern autonomous systems: accurate navigation and targeting when GPS is unavailable. The company's AI-powered platform transforms the low-cost inertial sensors already inside commercial drones into precision instruments without additional hardware, external signals, or complex integration. SPARC AI's software-only approach makes GPS-denied capability for target acquisition and navigation accessible at the price point and scale that modern drone operations demand, from single platforms to fleets of thousands.
