Stevens Gold Prepares for a Soil Geochemical Survey at their Millennium Gold Project

VANCOUVER, B.C. March 12, 2021 - STEVENS GOLD NEVADA INC. (CSE:SG, OTCQB:STVGF, FSE:311) (the "Company" or "Stevens Gold") announces that it will be deploying a crew of three geological technicians to Section 20 of its Millennium Gold property to undertake a soil geochemical survey. Gold mineralization is exposed at surface and in drill core in the form of low sulphidation epithermal mineralization and attendant alteration hosted by subaerially deposited volcanic rocks. Extensions of known gold zones are covered by overburden and can be an impediment to ongoing exploration.

The new sampling program will focus on an area of Section 20 where a previous Mobile Metal Ions soil survey in 2007 defined multi-sample ovoid and circular gold geochemical anomalies from widely spaced samples. High-contrast gold responses of up to 225 times background were defined by this survey defining an anomalous area of approximately 1 square kilometer. The new survey will reduce the sample spacing to provide focus for further prospecting, geophysical surveys and drilling.

Analyses will be undertaken at the Vancouver (B.C., Canada) laboratories of SGS Mineral Services. Assay results will be released as they are received.

The technical information in this report was reviewed and approved by Dr. Mark Fedikow, P.Geo., of Mount Morgan Resources Ltd. Dr. Fedikow is independent of Stevens Gold Nevada Inc., is a "Qualified Person" as defined by NI 43-101.

About Stevens Gold

Stevens Gold (CSE:SG, OTCQB:STVGF, FSE:311) is engaged in the business of mineral exploration and the acquisition of mineral property assets in North America. Stevens Gold is exploring the optioned Millennium Gold property in Arizona. The Millennium Gold property consists of three State mineral leases and 72 BLM claims totaling 3,408 acres and is in the general vicinity of the Oatman mining district where over 2 million ounces of bonanza-grade gold has been discovered and where Equinox's Castle Mountain open pit gold mine is located, please see the Technical Report filed on SEDAR for more information.
