

Tree of Knowledge Announces Receipt of NSERC Alliance Grant

Toronto, Ontario, February 18, 2021 – Tree of Knowledge International Inc. (CSE: TOKI) (“**TOKI**” or the “**Company**”) is pleased to announce that the collaborative project between TOKI subsidiary Toronto Poly Clinic Inc. (“**TPC**”), Ryerson University researchers and Northern Green Canada Inc. (“**NGC**”) has secured funding from the Natural Sciences and Engineering Research Council of Canada (“**NSERC**”).

The NSERC Alliance grants support innovative collaborations across a range of topics between University researchers and partners from the private, public, and not-for-profit sectors. The project being undertaken by TPC and its partners is to expand the development of a nanotechnology-enhanced delivery method involving natural anti-cancer drugs, such as cannabinoids and curcuminoids, for use in targeted cancer therapy.

“The independent review of our novel drug delivery research project and the resulted approval for funding by the Natural Sciences and Engineering Research Council of Canada is a great honour and seal of approval for our scientific direction. Our joint research program has already received the Health Canada license for Cannabinoid research.” TPC acts as the clinical knowledge contributor and the sponsor for this project. The Licensed Producer Northern Green Canada provides the cannabinoids to Ryerson researchers for this collaborative project with all new intellectual property developed in this project belonging to the sponsor, TPC”, said Dr. OJ Faghani, the CEO of Tree of Knowledge International Corp.
