

## Tevano Systems Holdings Inc. Corporate Update

**Vancouver, BC, July 8, 2021 — Tevano Systems Holdings Inc.** (CSE: TEVO, FRA: 7RB) (“**Tevano**”, or the “**Company**”), provides its corporate update on business, technology and marketing strategies for the second half of 2021.

As of July 5, 2021, the Canadian government reported 67% of Canadians 12 and up have received one Covid-19 vaccine dose and 27% have received two vaccine doses. Lockdown restrictions are starting to ease as governments try to balance the risks of Covid-19 and the desire to move to a less restrictive “new normal”.

“With vaccines being introduced, there has been a reduced sense of urgency for individual screening as jurisdictions open towards *business as usual*,” says David Bajwa, CEO. “While vaccines are important, they won’t stop the virus without measures such as screening and other health guidelines. All viruses change over time. Currently, the Delta and Lambda variants are causing havoc in several countries because of their high transmissibility and severity, even to those who have had both vaccine doses. We continue to position the Tevano Health Shield™ as the first line of defense in limiting the Corona-19 virus and other communicable diseases spreading in the workplace and the risk of full closure.”

Tevano continues to refine its marketing strategy to focus on the most critical and susceptible industries such as meat packing and food preparation while continuing in the food distribution network and other high-traffic environments. Over the last two months, Tevano has advanced the accuracy, functionality, and security of the Tevano Health Shield™ software by improving its algorithm and scanning technology to provide instant temperature detection and to provide other safety protocols frequently requested by users. This includes dynamic-form data collection augmented by QR scanning which provides additional throughput efficiency, back-end tool sets, and security enhancements yielding unparalleled screening technology in front and behind the corporate firewall.

Tevano is looking at other safety and security software offerings it can bring to market. Management intends to continue to invest in sales and marketing to position the company as the first choice in temperature and safety protocol detection while augmenting with in-demand technology for a post-Covid environment.

### **About Tevano**

Tevano is a hardware and software business solutions company. Its initial product Health Shield™, is an innovative AI-driven electronic device which provides instant body

temperature scanning and notifies users if they need to wear a face mask. Health Shield™ devices can be placed at all entrances where patrons and/or employees gain access to buildings. The Health Shield™ device is supported by a cloud software solution that can manage multiple devices and provide detailed reporting and analysis.

**CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION:** This news release contains forward-looking statements and forward-looking information within the meaning of applicable securities laws. These statements relate to future events or future performance. All statements other than statements of historical fact may be forward-looking statements or information. More particularly and without limitation, this news release contains forward-looking statements and matters. The forward-looking statements and information are based on certain key expectations and assumptions made by management of the Company. Although management of the Company believes that the expectations and assumptions on which such forward-looking statements and information are based are reasonable, undue reliance should not be placed on the forward-looking statements and information since no assurance can be given they will prove correct.

Forward-looking statements and information are provided to provide information about the current expectations and plans of management of the Company relating to the future. Readers are cautioned that reliance on such statements and information may not be appropriate for other purposes, such as making investment decisions. Since forward-looking statements and information address future events and conditions, by their very nature they involve inherent risks and uncertainties. Actual results could differ materially from those currently anticipated due to several factors and risks. These include, but are not limited to, the Company's ability to raise further capital and the Company's ability to obtain regulatory and exchange approvals. Accordingly, readers should not place undue reliance on the forward-looking statements and information in this news release. Readers are cautioned that the foregoing list of factors is not exhaustive. The forward-looking statements and information in this news release are made as of the date hereof and no undertaking is given to update publicly or revise any forward-looking statements or information, whether as a result of new information, future events or otherwise, unless so required by applicable securities laws. The forward-looking statements or information in this news release are expressly qualified by this cautionary statement.
