

UniDoc to Update and Relaunch Legacy eHealth Systems with Pawnee Mental Health Services Across Rural Kansas

Ex-AMD Telemedicine account aims to relaunch utilizing UniDoc Connect-enabled eHealth system

VANCOUVER, BC / May 07, 2026 / UniDoc Health Corp. (CSE: UDOC) (FRA: L7T) (OTCQB: UDOCF) ("UniDoc" or the "Company") is pleased to announce that Pawnee Mental Health Services ("Pawnee"), a provider of mental health, substance use recovery and crisis services across 10 north central Kansas counties, has purchased UniDoc Connect software licenses to trial and relaunch eHealth equipment across its rural Kansas office network. Pawnee's account originated with AMD Telemedicine which transitioned to UniDoc following [the Company's purchase of AMD Telemedicine software](#) and related assets.

Key Takeaways:

- Pawnee purchased UniDoc Connect software licenses to trial eHealth equipment.
- The trial will focus on testing, resetting and retraining users on eHealth Clinical Assist and Vital Signs Carts.
- The program addresses a rural staffing constraint across Pawnee's multi-county office network.

Case Study: Pawnee Mental Health Services

Pawnee provides care across a rural region of Kansas. Its services are focused on mental health, and the organization has expanded to add select health services in person and through eHealth.

The size and geography of Pawnee's service area create a staffing constraint. Pawnee does not have the advanced-practice registered nurses and other healthcare professionals needed to place clinical staff at each office location. The eHealth trial is intended to help Pawnee assess how remote clinical workflows can support care across multiple offices.

Implementation Scope

Pawnee purchased eHealth equipment through AMD Telemedicine before UniDoc's acquisition of AGNES Connect and related AMD Telemedicine assets. Under the UniDoc Connect software license, Pawnee is now trialing the equipment and restarting the program.

The current scope includes two use cases: Clinical Assist Carts are distributed across rural Pawnee locations and include UniDoc Connect software, a multipurpose medical video camera, a stethoscope and vital signs monitors. The Vital Signs Carts are located at larger Pawnee offices to assist non-medical professionals with taking and recording vitals.

Program History and Future Aims

Pawnee's eHealth program had paused due to staffing and priority changes. The relaunch is focused on equipment testing, system resets and user retraining.

The Company expects the trial to support Pawnee's assessment of how UniDoc Connect-enabled equipment can help extend medical support across its existing office footprint without requiring an advanced practice registered nurses or other healthcare professional to be present in every location.

"Pawnee's use case shows why UniDoc pursued the AMD assets," said Tony Baldassarre, CEO of UniDoc Health Corp. "The equipment is in place. The need is to bring the systems back online, train users and prove out how the software can support remote clinical workflows across rural offices. This account also reflects our plan to support historic AGNES customers, turning them into current UniDoc Connect customers."

On Behalf of the Board of Directors,

About UniDoc Health Corp. (CSE: UDOC) (FRA: L7T) (OTCQB: UDOCF)

UniDoc is developing an eHealth solution which is being designed as a self-contained remote virtual clinic within a private kiosk for patients to undergo full consultations as if they were present in a physician's office. eHealth opens the doors to a large segment of the population challenged by access, experience or understanding of online computer technology. It is the Company's belief that physical accessibility is the key to its business proposition.

UniDoc is dedicated to unlocking shareholder value by delivering an excellent product and sophisticated commercial network within an expedited timeframe. The UniDoc team encourages engagement, questions, and interest, so please stay in touch and invite anyone who might be interested in our story to visit our website at www.unidoctor.com and sign up to receive the latest information with updates on our activities, events and progress.

Forward-Looking Statements

This news release contains statements and information that, to the extent that they are not historical fact, may constitute "forward-looking information" within the meaning of applicable securities legislation. Forward-looking information may include financial and other projections, as well as statements regarding future plans, objectives, or economic performance, or the assumption underlying any of the foregoing. In some cases, forward-looking statements can be identified by terms such as "may", "would", "could", "will", "will be", "likely", "except", "anticipate", "believe", "intend", "plan", "forecast", "project", "estimate", "outlook", or the negative thereof or other similar expressions concerning matters that are not historical facts. Examples of such statements include, but are not limited to, Pawnee's use of UniDoc Connect software to test and restart its program and retrain its staff across its rural Kansas service area, and the potential results of its trial of UniDoc Connect.

Forward-looking information is based on the assumptions, estimates, analysis, and opinions of management made in light of its experience and its perception of trends, current conditions and expected developments, as well as other factors that management believes to be relevant and reasonable in the circumstances at the date that such statements are made, but which may prove to be incorrect. The

material factors and assumptions used to develop the forward-looking information contained in this news release include, but are not limited to, key personnel and qualified employees continuing their involvement with the Company; the Company's ability to secure additional financing on reasonable terms; the competitive conditions of the industries in which the Company operates; and laws and any amendments thereto applicable to the Company.

Forward-looking information involves known and unknown risks, uncertainties and other factors that may cause the actual results, performance or achievements of the Company to differ materially from any future results, performance or achievements expressed or implied by the forward-looking information, including, without limitation, risks relating to the future business plans of the Company; risks that the Company will not be able to retain its key personnel; risks that the Company will not be able to secure financing on reasonable terms or at all; as well as all of the other risks as described in the Company's annual management discussion and analysis for the year ended March 31, 2025 under the heading "Risks Factors." Accordingly, readers should not place undue reliance on any such forward-looking information.

Further, any forward-looking information speaks only as of the date on which such statement is made. New factors emerge from time to time, and it is not possible for the Company's management to predict all such factors and to assess in advance the impact of each such factor on the Company's business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking information. The Company does not undertake any obligation to update any forward-looking information to reflect information or events after the date on which it is made or to reflect the occurrence of unanticipated events, except as required by law, including securities laws.

The CSE does not accept responsibility for the adequacy or accuracy of this release.
