

## VirtualArmour Launches Client Cyber Warranty Program

VANCOUVER, British Columbia, July 18, 2017 (GLOBE NEWSWIRE) -- Premier Managed Services Provider, VirtualArmour International Inc. (the "**Company**") (CSE:VAI) (Frankfurt:3V3), announced today the launch of its new Cyber Warranty program.

Designed to offer an additional, independent layer of protection to VirtualArmour clients who have received professional services, the Cyber Warranty covers costs associated with the remediation and system updates that might be required as a result of a subsequent external data breach.

Our ability to cover our professional services work with a Cyber Warranty is just one more component in the VirtualArmour strategy to be the premier risk consulting and strategic advisor to our clients.

"While we know VirtualArmour offers an industry-leading level of service and expertise to its clients, we also believe there's value to our clients in having the quality and professionalism of this work warranted. VirtualArmour prides itself on an immensely strong client retention rate of 96%. We believe this new Cyber Warranty program further reinforces our commitment to maintaining this long into the future." said Russ Ambrust VP of Sales at VirtualArmour.

The Cyber Warranty differs from Cyber Insurance agreements which are more commonly held by organizations to cover legal defense and settlement costs incurred as a result of a data breach.

### **About VirtualArmour**

VirtualArmour is an international cybersecurity and Managed Services provider that delivers proprietary solutions to help businesses build, monitor, maintain and secure their networks.

The Company maintains 24/7 client monitoring and service management with specialist teams located in its US and UK-based security operation centers ("SOC"). Through partnerships with best-in-class technology providers, VirtualArmour delivers leading hardware and software solutions for customers that are both sophisticated and scalable, and backed by industry-leading customer service and experience.

VirtualArmour's proprietary CloudCastr client portal and prevention platform provides clients with unparalleled access to real-time reporting on threat levels, breach prevention and overall network security.

VirtualArmour services a wide range of clients – which include those listed on the Fortune 500 – within several industry sectors, in over 30 countries, across five continents.
