

## VirtualArmour Strengthens UK Security Operations Center Increasing Specialist Staffing by 25%

VANCOUVER, British Columbia, Aug. 03, 2017 (GLOBE NEWSWIRE) -- Premier Managed Services Provider, VirtualArmour International Inc. (the "**Company**") (CSE:VAI) (Frankfurt:3V3) announced today that it has expanded its current Security Operations Center (SOC) staff by 25% in response to its growing business.

The UK **security operations center** ("SOC") is one of two physical facilities where VirtualArmour uses its proprietary platform to provide managed services to enterprise clients. This includes the 24/7/365 monitoring and maintenance of applications, servers, networks, and endpoints based on specific customer requirements.

This expansion includes the addition of new Senior Engineers and System Administrators, each coming to their positions with the highest certifications required to work with VirtualArmour's select technology partners.

"This expansion of staff allows us to maintain the superior level of services that our clients expect and that differentiates us from competitors in the market," said Andrew Douthwaite, VP of Managed Services at VirtualArmour. "We are proud of the continued growth of our teams and our ability to scale in line with our growing customer base."

This growth also allows greater opportunity for UK based businesses to take advantage of local teams to support their operations, while providing the redundancy for North America-based enterprises through VirtualArmour's "Follow the Sun" model of 24/7/365 service provision.

### **About VirtualArmour**

*VirtualArmour is an international cybersecurity and Managed Services provider that delivers customized solutions to help businesses build, monitor, maintain and secure their networks.*

*The Company maintains 24/7 client monitoring and service management with specialist teams located in its US and UK-based security operation centers ("SOC"). Through partnerships with best-in-class technology providers, VirtualArmour delivers only leading hardware and software solutions for customers that are both sophisticated and scalable, and backed by industry-leading customer service and experience.*

*VirtualArmour's proprietary CloudCastr client portal and prevention platform provides clients with unparalleled access to real-time reporting on threat levels, breach prevention and overall network security.*

*VirtualArmour services a wide range of clients - which include those listed on the Fortune 500 - within several industry sectors, in over 30 countries, across five continents.
