

Taloflow Launches Real-Time AI Cloud Resource Management Software for AWS

.....Victory Square Portfolio Company, launches Tim, the Taloflow Instance Manager, an AI autopilot for cloud resource management that saves companies up to 40% on AWS

VANCOUVER, BRITISH COLUMBIA, CANADA (December 6, 2018) – Victory Square Technologies Inc. ("**Victory Square**" or the "**Company**") (CSE:VST) (OTC:VSQTF) (FWB:6F6) today announced that its portfolio company, Taloflow -- an Amazon Web Services Advanced Technology Partner – has launched Tim, the Taloflow Instance Manager. Tim is an AI autopilot for cloud resource management that saves companies up to 40% on Amazon Web Services ("AWS").

Tim is a breakthrough software since more than 35% of public cloud spending is wasted on poor resource provisioning and obtuse pricing mechanics. This is huge waste given that public cloud services spending is expected to hit \$277 billion in 2021 (International Data Corporation "IDC"). The unique application of AI manifested in Tim improves upon the human-led monitoring of resources by learning from the entire engineering team's input over time and adopting a precise understanding of the impact on the performance of cloud-based workloads and services.

"We're proud of the Taloflow Instance Manager and all of us at Victory Square are thrilled with the strong market reception that Tim has received," said Shafin Diamond Tejani, CEO of Victory Square Technologies. "Victory Square continues its progressive focus on the global artificial intelligence market and the successful launch of Tim is a great step forward for Taloflow as a VST portfolio company."

Tim works in real-time and through its AI model can calculate a company's AWS spend by the minute. Tim monitors all the company's AWS resources and workloads and provides tailored, actionable recommendations on cost savings through Slack.

"The Victory Square team has provided us with valuable counsel and guidance on growth," said Louis-Victor Jadavji, CEO of Taloflow. "Their introductions have led to signing several mid-size and enterprise customers, key lead orders for our startup company. We are excited to continue to work with the growth advisors at Victory Square to bring AI to cloud compliance and security and create measurable impact in this significant market."

Tim is currently in public beta and provides:

1. Automated discovery and cost tags for all AWS resources
2. Real-time AWS cost monitoring through AI cost model
3. Tailored, actionable recommendations on cost savings

Companies can apply to Tim's beta program completely free of charge at <https://www.taloflow.ai/contact/>
