

## Winston Gold Opens Second Portal Entrance

**WINNIPEG, Manitoba, September 11<sup>th</sup>, 2019 (GLOBE NEWSWIRE) -- Winston Gold Corp. (“Winston Gold” or the “Corporation”) (CSE:WGC) (OTCQB:WGMCF)** is pleased to announce that it has collared a second portal entrance at its wholly-owned Winston gold Project near Helena, Montana.

This second portal entrance is now being constructed at the site of a historic tunnel, called Tunnel #1. This tunnel will be widened to 12-by-12 ft and rehabilitated. Winston Gold believes that it was last used in the late 1970’s or early 1980’s to access the upper level of the historic Custer workings in order to mine out sections of the vein to the surface.

Tunnel #1 is located on the hanging wall side of the Custer vein, about 1,500 ft (457 metres) northwest of the Carrabba Portal. The newly named, Carrabba portal, is currently being developed on the footwall side of the historic Custer vein to gain access to the high-grade, and near surface mineralization, including the Parallel and Block 93 veins (Refer to News Release dated September 5<sup>th</sup> 2019).

The Carrabba tunnel is also expected to access the old Custer Workings on the same level as Tunnel #1 but about 1,000 ft. (304 metres) to the southwest of where Tunnel #1 is expected to intersect them.

The decision to construct a second access point via Tunnel #1 was made for several reasons:

- It will serve as a secondary escapeway which is a necessary safety precaution for all underground operations.
- It will provide manageable free airflow for ventilation when test-mining commences.
- The tunnel will provide quick access to the historic Custer workings and allow for additional exploration drilling and possibly test mining in known prospective zones.
- The Parallel Vein was discovered in the footwall of the Custer Vein. Other similar veins or a continuation of the Parallel vein may exist in the area immediately accessed by Tunnel #1.

“Rehabilitating Tunnel #1 will be the most cost-effective method to gain access to the upper levels of the historic Custer mine while also providing quality airflow and a secondary escapeway,” commented Murray Nye, CEO of Winston Gold Corp. “As a bonus, it also allows us to drill test for additional blind vein targets in the footwall of the Custer Vein and sample the margins of the Custer vein for potentially economic gold mineralization.”

The timing of completion of the Tunnel #1 rehabilitation will largely depend on what condition the old tunnel is in. Sections of it may have collapsed which will naturally cause delays.

### **Qualified Person**

The scientific and technical content and interpretations contained in this news release have been reviewed, verified and approved by Dr. Criss Capps PhD. P.Geol., an independent consultant to Winston Gold Corp. Dr. Capps is a Qualified Person as defined in National Instrument 43-101 Standards of Disclosure for Mineral Projects.

## **About Winston Gold**

Winston Gold is a junior mining company focused on advancing high-grade, low cost mining opportunities into production. Towards that end, the Corporation has acquired the under-explored and under-exploited Winston Gold project near Helena, Montana.

The CSE has neither approved nor disapproved the information contained herein.

This news release does not constitute an offer to sell or a solicitation of an offer to buy any of the securities in the United States. The securities have not been and will not be registered under the United States Securities Act of 1933, as amended (the "U.S. Securities Act"), or any state securities laws and may not be offered or sold within the United States or to U.S. Persons unless registered under the U.S. Securities Act and applicable state securities laws or an exemption from such registration is available.

## **Forward-Looking Information**

This release includes certain statements that may be deemed "forward-looking statements". All statements in this release, other than statements of historical facts, that address events or developments that Winston Gold Mining Corp. (the "Company") expects to occur, are forward-looking statements. Forward-looking statements are statements that are not historical facts and are generally, but not always, identified by the words "expects", "plans", "anticipates", "believes", "intends", "estimates", "projects", "potential" and similar expressions, or that events or conditions "will", "would", "may", "could" or "should" occur. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results may differ materially from those in the forward-looking statements. Factors that could cause the actual results to differ materially from those in forward-looking statements include regulatory actions, market prices, exploitation and exploration successes, and continued availability of capital and financing, and general economic, market or business conditions. Investors are cautioned that any such statements are not guarantees of future performance and actual results or developments may differ materially from those projected in the forward-looking statements. Forward-looking statements are based on the beliefs, estimates and opinions of the Company's management on the date the statements are made. Except as required by applicable securities laws, the Company undertakes no obligation to update these forward-looking statements in the event that management's beliefs, estimates or opinions, or other factors, should change.
