#### **Report on Business**

1. Provide a general overview and discussion of the development of the Issuer’s business and operations over the previous month. Where the Issuer was inactive disclose this fact.

*From March 3 to March 6, 2019, representatives of Western attended the Prospectors & Developers Association of Canada (PDAC) International Convention, Trade Show & Investors Exchange held at the Metro Toronto Convention Centre in Toronto, Canada. Western exhibited at a booth in the Investors Exchange throughout the conference.*

*The CEO of the Company, Mr. George Glasier, had individual meetings with shareholders and stakeholders throughout PDAC. In addition, Western attended the PDAC 2019 Investor Luncheon where Mr. George Glasier made a presentation of Western among a select group comprised of the CSE’s most promising mineral exploration companies. The participation at PDAC was also reported in the Form 7 for February 2019.*

On March 13, 2019, the Company issued a news release providing a shareholder update regarding its previously announced plan to re-open the Sunday Mine Complex (“SMC”) for a vanadium project. The following is an excerpt from that news release:

“Over the last several months, Western has advanced the re-opening of the SMC by:

1. Preliminary Mine Planning and Budgeting;
2. Evaluation of Equipment and Personnel Requirements and Availability;
3. Pursuing Project Funding Options; and
4. Expanding Vanadium Marketing Opportunities.

The SMC Vanadium Project will be commenced within weeks of satisfactory project funding. The primary goals to be completed during the following six to nine months are:

1. Identification of High-Grade Vanadium Zones measured by X-Ray Fluorescence Technology and Sample Assay Analysis;
2. Long-Hole Drilling and Bulk Sampling from the Extensive Underground Mine Workings of the Sunday Mine Complex;
3. Expand Resource Estimates with New Defined High-Grade Vanadium Resource.
4. Delivery of Samples to Various Vanadium Processors and End-Users for Analysis; and
5. Negotiation of Vanadium Term Contracts to catalyze Mine Production.

Vanadium pentoxide prices have increased significantly over the past several years to a current level over \$17 per pound of V<sup>2</sup>O<sup>5</sup>. Independent market analysis by several recognized organizations suggest sustained vanadium price levels for the next three to five years. Western management believes these market conditions would make SMC vanadium production attractive over this period.

As Western advances with its plans for re-opening of the SMC and is able to report on the timing of preparations, anticipated start dates and other milestones, Western will provide shareholders and investors with further updates.”
