

NSJ Gold Corp. (CSE: NSJ) Announces Exploration Drilling Initiated at the Golden Hills Project, Arizona USA

Vancouver, BC, March 29, 2021, NSJ Gold Corp. (CSE: NSJ) (“NSJ” or the “Company”) announces that drilling at Golden Hills, located 40 km south of Parker, Arizona has begun. The program will consist of 10-14 drill holes to test the extent of previously discovered high-grade gold/copper veins and additional vein targets indicated by a recently conducted geophysical survey.

The project is being drilled by Alford Drilling LLC of Spring Creek, Nevada. The holes will be drilled using a reverse circulation (RC) rig. The drill holes will be angled across the near vertical vein targets with the average depth being 75-90 meters. Samples will be collected on 1.5 meter intervals, standard samples added and securely stored. When drilling is complete the samples will be shipped to ALS Chemex in Tucson, Arizona for gold, silver and copper analysis. Drilling is expected to be completed in approximately two weeks.

NSJ Gold Corp. has hired Simone Capital Corp. for Investor Relations services. Simone Capital, located in Toronto Ontario, will provide NSJ Gold Corp. with consulting services consisting of investor relations and corporate communications using its propriety data base to contact, with information provided by NSJ Gold Corp., stock brokers, portfolio managers, analysts, individual investors, newsletter writers and media contacts.
