KWG is funding the exploration program under its agreement to earn from Bold an 80% interest in any chromite discovered within the claims optioned by Bold

from Fancamp Exploration Ltd. hosting the Black Horse chromite occurrence. KWG may also earn a 20% interest in any other metals discovered on the property

As recommended in the 43-101 report commissioned by KWG and prepared to document the inferred chromite resource following last winter's drilling program, the possible down-dip extension of the resource will be tested with a series of deep holes. Orbit Garant Drilling Services Inc. has been awarded the drilling contract to utilize up to three drills.

Metallurgical test work which is ongoing has produced encouraging results to indicate that the Black Horse chromite appears to be amenable to reduction into metalized chrome and iron using natural gas.
