**NEWS RELEASE**

**SOUTHBRIDGE COMPLETS PHASE 1 EXPLORATION PROGRAM ON THE SONA PROPERTY**

---

VANCOUVER, BRITISH COLUMBIA – March 4, 2013 – Southbridge Resources Ltd. (“Southbridge” or the “Company”) has received the report of Kristian Whitehead, P.Geo., on its regional soil sampling and mapping program on the Company's Sona copper-silver-gold exploration property located in the Blackwater area of central British Columbia.

The exploration program focused on the western half of the property, and consisted of 421 soil samples collected at 100 x 100 meter spacing. Mapping along with rock sampling was conducted where outcrops were located in an effort to better understand local geology and develop further exploration strategy if warranted. The exploration program was designed to follow the prescribed Phase 1 recommended work in the NI 43-101 report filed for the property in 2011. The Company acquired, through the payment of staking costs, two additional claims, the Sona 3 and Sona 4 claims bringing the total number of hectares to approximately 1,500. The report recommended that additional soil sampling of the unexplored eastern and southern portions of the property be undertaken with a budget of approximately \$65,000.

The Sona property lies approximately 160 km SSW of Vanderhoof, British Columbia. It is proximal to claims owned by New Gold Inc. (NGD-T), where New Gold is currently drilling its Blackwater gold project (refer to New Gold Inc. March 7, 2012 news release).

The Company will not proceed with any additional field work at this time and will review the Blackwater opportunity provided by the Sona project along with additional mineral resource opportunities that it intends to review and consider.

The Company has granted incentive stock options for Directors, Officers, employees and consultants, entitling them to purchase an aggregate of 350,000 shares in the capital of the Company in accordance with the Company's stock option plan. The options are exercisable until March 4, 2016 at a price of C\$0.05 per share.

Southbridge Resources Ltd. is a Canadian-based mineral exploration company whose objective is to locate, acquire and evaluate mineral properties and to finance their exploration and potential development by way of joint venture, equity financing, option agreements or by other means.
