

ORCA TOUCHSCREEN APPROVED FOR LISTING AND COMMENCES TRADING ON THE CSE

Vancouver, BC, June 12, 2014 – Orca Touchscreen Technologies Ltd. (the “**Company**” or “**Orca Touchscreen**”) (CSE:OAA) is pleased to announce that it received approval today to list its common shares for trading on the Canadian Securities Exchange (“**CSE**”), and that its common shares will commence trading at the opening of market, tomorrow, June 13, 2014 under the trading symbol “OAA”. On commencement of trading, the Company will become a reporting issuer in Ontario.

About Orca Touchscreen

Orca Touchscreen sells and distributes capacitive touchscreens for mobile, medical, industrial and other applications. The popularity of smartphones, tablets, and many types of smart appliances is driving the demand and acceptance of touchscreens for portable and functional electronics. Touchscreens are also found in the medical field and in heavy industry, as well as for automated teller machines (ATMs), and kiosks such as museum displays or room automation. NPD DisplaySearch reported that more than 7% of the mobile phone marketplace would be equipped with touchscreens in 2012, a number that is estimated to grow to 16.7% of the market by 2018.

Through its wholly-owned subsidiary, Orca Mobile Solutions Ltd. (“**Orca Mobile**”), Orca Touchscreen acquired from Sollensys, Corp., a Korean touchscreen manufacturer, an exclusive, 6-year worldwide license to sell and distribute Sollensys products and to use Sollensys’ 18 patents. These patents relate to multi-gesture functionality, stylus designs, manufacturing processes and Sollensys’ unique technology for interfacing with the human hand.

Sollensys, founded in May, 2010, is capable of manufacturing a wide range of touchscreens for consoles, kiosks, tablets and the next-generation devices expected to gain popularity during the next decade. Sollensys has a portfolio of successful innovations, including *LG/Prada*, *Blackberry Storm* and *Samsung Haptic*. Sollensys can offer finished goods to customers quickly, in approximately half the time other original equipment manufacturing (OEM) companies can. As well, Sollensys can develop a new type of touchscreen panel (to meet a customer’s unique specifications) within three months, whereas other touchscreen developers take seven to nine months.

Through its Orca Mobile subsidiary, Orca Touchscreen also acquired from Sollensys all the intellectual property, including a registered patent, relating to an innovative laminating apparatus used to manufacture touchscreens with fewer defects and in less production time.

Major customers of touchscreens are manufacturers of smartphones, tablets, touch-based personal computers and laptops, mp3 players, GPS navigation systems, car controls, exercise

equipment, educational and public information kiosks, point of sale devices, e-readers, medical devices and gaming consoles.
