MONTHLY PROGRESS REPORT

Name of CNSX Issuer: Newlox Gold Ventures Corp (the "Issuer").

Trading Symbol: LUX

Number of Outstanding Listed Securities: 45,366,991

Date August 7 2014

Report on Business

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

The Company is exploring precious metal related business opportunities focused on Nicaragua, Costa Rica, and Ecuador. It has been collaborating with qualified people experienced in acquisition of precious metals from various sources, including artisan miners, recycling, private sellers and internal production in these regions and examining processing technologies in collaboration with the Norman B. Keevil Institute of Mining Engineering at the University of British Columbia.

Processing systems testing continued in Costa Rica where the Company's gravity concentration system proved effective in producing concentrate grading +500 grams per tonne of gold.

In accordance with recommendations presented by the University of British Columbia a new ball mill and a new 6- Cell Denver Flotation Circuit, has been purchased and installed at the plant. This new equipment is designed to recover fine gold, which is not currently recovered by the gravity concentration. The UBC lab testing has identified this additional recovery as the primary value driver in the tailings material.

In addition, the Company has upgraded the power infrastructure at the pilot plant to supply ample grid electricity to support the upgraded operations while avoiding costly on-site power generation.

In keeping with the strategy of delivering operational cash flow to support organic growth, the Newlox team has continued to ramp-up a gold trading platform in Latin America whereby the company purchases gold from various sources in the field before reselling the metal through established networks. During the period, Newlox continued to achieve an average profit margin of 11% per trade; a result management feel is robust in spite of the decline in the gold price.

2. Provide a general overview and discussion of the activities of management.

Management has been recruiting new Principals, investors and experts as part of their plan to apply optimal processing technologies to existing tailings stockpiles in Latin America to achieve environmental reclamation and precious metals recovery.

3. Describe and provide details of any new products or services developed or offered. For resource companies, provide details of new drilling, exploration or production programs and acquisitions of any new properties and attach any mineral or oil and gas or other reports required under Ontario securities law.

The Company has been involved in the evaluation of innovative processing technologies to remediate stockpiled tailings material and has been operating a pilot plant in Costa Rica which has been delivering positive results.

Processing systems testing continued in Costa Rica where the Company's gravity concentration system proved effective in producing concentrate grading +500 grams per tonne of gold.

In accordance with recommendations presented by the University of British Columbia a new ball mill and a new 6- Cell Denver Flotation Circuit, has been purchased and installed at the plant. This new equipment is designed to recover fine gold, which is not currently recovered by the gravity concentration. The UBC lab testing has identified this additional recovery as the primary value driver in the tailings material.
