17. Discuss any trends which are likely to impact the Issuer including trends in the Issuer's market(s) or political/regulatory trends.

The Company has historically relied upon equity financings to satisfy its capital requirements and will continue to depend heavily upon equity capital to finance its activities. The Company is convinced that it will need additional capital in the future to finance the ongoing commercialization of its technology projects and such capital will have to be derived from the exercise of outstanding stock options, warrants and/or the completion of other equity financings, including possible governmental subsidies, and additional sales contracts.

Nass Valley Gateway has limited financial resources and presently has no source of operating income. Although the Company has been successful in the past in financing its activities through the sale of equity securities and loans from insiders, there is no assurance that additional funding will be available to it for future development of its projects. The Company's ability to arrange additional financing in the future will depend, in part, on the prevailing capital market conditions and success in its projects.

There can be no assurance that continual fluctuations in the Company's share prices will not occur or that these fluctuations will not affect the ability of the Company to raise equity funding, and if at all, without causing a significant dilution to its existing shareholders. Any quoted market for the common shares may be subject to market trends generally, notwithstanding any potential success of the Company in creating revenue, cash flows or earnings.
