Cannabix Technologies Releases Renderings & Video of Marijuana Breathalyzer

The Cannabix Hand-held THC Marijuana Breathalyzer is being developed to give law enforcement and employers the ability to test for recent consumption of the THC component of marijuana. Prototype renderings will be showcased at the National Marijuana Business Conference and Expo.

Vancouver, British Columbia, November 12, 2014, 2014 -- Cannabix Technologies Inc. (CSE: BLO) (OTC PINK: BLOZF) is pleased to report the release of its first publicly available device renderings and video presentation of its Cannabix Marijuana Breathalyzer. Cannabix is developing a feature rich, durable, hand-held THC breathalyzer device for law enforcement and the workplace.

Media files and video which show the design and features of the prototype are available for online viewing at cannabixtechnologies.com. The product renderings will also be showcased at the National Marijuana Business Conference and Expo from November 12-14, 2014 at the Rio in Las Vegas, Nevada. Cannabix senior executives will be sharing the video demo and discussing prototype development progress at booth 219.

"We are impressed with the amount of increasing interest that has been expressed for the Cannabix Marijuana Breathalyzer device from a wide range of industries and potential users," said Kal Malhi, President of Cannabix Technologies Inc. "With the legalization of marijuana in several U.S. states and zero tolerance for marijuana impaired driving in 12 States, we can see that the need for the product is significant."

Cannabix is pleased to report that development of its Marijuana Breathalyzer prototype is progressing well with hardware circuits and printed circuit board designs now complete. Software development is well underway with drivers for the various sub-systems already executing.

"We are working to create a device that will be durable for everyday field use," added Malhi. "A device that will be easy to administer and provide results quickly and reliably."

About Cannabix Technologies Inc.

[Cannabix Technologies Inc.](http://CannabixTechnologiesInc.com) is the developer of the patent pending Cannabix Marijuana Breathalyzer for law enforcement and the workplace. The Cannabix Marijuana Breathalyzer drug-impairment recognition system is based on breath testing technology that has been developed to test individuals for recent consumption of the THC component of marijuana. Cannabix is advancing its products to enable law enforcement personnel to use

this technology to enhance detection of marijuana impaired driving offences on North American roads at a time when marijuana is becoming legal in many jurisdictions. Cannabix is working to develop a drug-testing device that will detect Tetrahydrocannabinol (THC- the psychoactive component of marijuana that causes intoxication) using breath samples. The device would be used to provide detection of THC at the roadside to identify drivers intoxicated by the recent use of marijuana. The device will also be useful for other practical applications such as testing employees in the workplace where intoxication by THC can be hazardous. The device is currently in prototype development and the Company is rapidly developing this technology.

We seek Safe Harbor.

Cautionary Statement Regarding Forward-Looking Statements

This press release contains forward-looking information that involves various risks and uncertainties regarding future events. Such forward-looking information can include without limitation statements based on current expectations involving a number of risks and uncertainties and are not guarantees of future performance of the Company, such as final development of a commercial or prototype product(s), successful trial or pilot of company technologies, no assurance that commercial sales of any kind actually materialize; no assurance the Company will have sufficient funds to complete product development. There are numerous risks and uncertainties that could cause actual results and the Company's plans and objectives to differ materially from those expressed in the forward-looking information, including: (i) adverse market conditions; (ii) risks regarding protection of proprietary technology; (iii) the ability of the Company to complete financings; (v) the ability of the Company to develop and market its future product; and (vi) risks regarding government regulation, managing and maintaining growth, the effect of adverse publicity, litigation, competition and other factors which may be identified from time to time in the Company's public announcements and filings. There is no assurance that the marijuana breathalyzer business will provide any benefit to the Company, and no assurance that any proposed new products will be built or proceed. There is no assurance that existing “patent pending” technologies licensed by the Company will receive patent status by regulatory authorities. The Company is not currently selling commercial breathalyzers. Actual results and future events could differ materially from those anticipated in such information. These and all subsequent written and oral forward-looking information are based on estimates and opinions of management on the dates they are made and are expressly qualified in their entirety by this notice. Except as required by law, the Company does not intend to update these forward-looking statements.
