## **PRESCIENT PROVIDES UPDATE ON MMPR LICENSE**

November 25, 2014

CSE: PMC

---

Vancouver, BC – November 25, 2014: Prescient Mining Corp. (CSE: PMC) (“Prescient” or the “Company”) is pleased to provide an update of the status of Aurora Cannabis Enterprises Inc.’s (“Aurora”) application to become a licensed producer pursuant to the Marihuana for Medical Purposes Regulations (“MMPR”). Aurora is a wholly owned subsidiary of Aurora Marijuana Inc.

In August 2014, Health Canada (“HC”) conducted an inspection of Aurora’s production facility and in September 2014, HC delivered the results of the inspection which included three (3) citations, two of which were minor in nature. The third citation required that all HVAC systems be fully operational, the facility must be fully ready to take the product from seed stage to dried stage and all components of the production facility must be in place and functional.

In November 2014, Aurora requested HC to perform an inspection of the facility. Upon HC’s request, Aurora provided them with the final drawings of all areas of the facility and a confirmation that Aurora is ready for the next inspection prior to granting of the license.

Aurora worked diligently to complete the facility in accordance with HC’s requirements. We are pleased to report that Aurora’s state of the art facility is now ready and awaiting inspection by HC.

President and CEO, Marc Levy, stated, “Health Canada has been in constant communication with Aurora since the application was submitted in July of 2013. They have been supportive whenever we have had questions or concerns regarding the application process. Health Canada's commitment to the integrity of the MMPR has been stellar; this is evidenced in the continual improvements made to the licensing procedure. We believe that HC will continue to set high and stringent processing standards. Canada has some of the very best regulations for access and delivery of safe and effective medical marijuana. Our experience with The Office of Controlled Substances has also been supportive throughout the process and excellent to deal with during the inspections of our facility. We consider becoming a Licensed Producer as an honour and a privilege.”

We extend our sincere appreciation to our shareholders for their continued support and understanding throughout this process.

On behalf of the Board of Directors,

**PRESCIENT MINING CORP.**
