There is a convertible debenture outstanding to an officer and director of the company, incurred in August 2011, in the amount of \$65,000. 16. Provide details of any changes in directors, officers or committee members.

None.

17. Discuss any trends which are likely to impact the Issuer including trends in the Issuer's market(s) or political/regulatory trends.

The market for exploration companies can prove challenging in terms of raising sufficient capital to fund exploration activities. There is no guarantee that fundraising efforts will be successful on a continuing basis, however, given that the company is exploring for gold, a strong market for gold itself sets an expectation that there would be a greater possibility of success in raising capital within the market in order to fund exploration work.

The company is currently in the exploration phase of operations and is subject to environmental conditions and availability of field personnel in order to carry out its activities. So far the company has not had any difficulty in hiring field personnel to realize this work; however, inadequate seasonal and environmental conditions from time to time prevent the company from completing planned procedures which can cause delays in components of its exploration program.

In terms of political and regulatory trends, Canada is a mining-friendly nation with a resource-driven economy and therefore the company does not expect to encounter significant difficulty in obtaining the necessary permits and licences to carry out its work.
