VapeTronix is a Canadian vaporizer ("Vape") and Electronic Cigarette ("E-Cig") company that was formed to capitalize on opportunities and technology related to the growing Vape and E-Cig sectors. VapeTronix owns the exclusive rights to the "1313" E-Cig brand, medicinal marijuana mobile application technology and several research and development projects within the Vape and E-Cig space.

Highlights of the VapeTronix business and acquisition are:

- 1313's flavoured E-Cigs are currently being sold in Ontario with Canada wide expansion planned;
- 1313's nicotine E-Cigs are ready for planned roll-out into the US market;
- Additional products in queue to add additional revenue opportunities for the Issuer;
- VapeTronix principals will remain engaged by the Issuer and will assist with product branding and sales roll-out; and
- VapeTronix will merge its marketing and development team with the Issuer to work with the Issuer on leveraging various synergies between the medicinal marijuana mobile application and vaporizer technology with the anticipated MMPR license to be issued to AAA Heidelberg.

About VapeTronix:

1313 is an emerging player in the burgeoning E-Cig market (<http://www.1313cigs.com>). 1313 E-Cigs are disposable electronic cigarettes that contain between 500 and 650 "puffs" and are packaged for convenience. A single 1313 E-Cig is the equivalent of 2 and ½ packs of traditional cigarettes. VapeTronix has assembled a strong portfolio of unique flavours that have been tested and approved for commercial production. After a successful limited market trial launch, initial commercial roll-out of 1313 E-Cigs has begun in Ontario. Select convenience stores and nightclub establishments in the GTA area have begun selling the nicotine free 1313 E-Cig products consisting of watermelon, vanilla, peach and green apple flavours on a retail basis. VapeTronix plans to continue sales expansion of 1313 E-Cigs to major urban centres across Canada in 2015 and beyond. A unique line of "E-Shisa" flavours that will appeal to the North American and Middle Eastern hobbyist hookah smoker are also in test phase. 1313 has begun test trials in the US markets for its nicotine products and plans to further pursue this market opportunity in due course.

In addition to the 1313 E-Cig brand, VapeTronix has incubated a development stage medicinal marijuana mobile application tracking technology that syncs a vaporizer device to a smart phone and will be aimed at the Canadian medical marijuana user. The medical marijuana mobile application will track a variety of metrics for patients and physicians alike such as cannabis usage data, the efficacy of certain strains, side effects as well as several other features. The VapeTronix team will work in conjunction with the Issuer and AAA Heidelberg to implement additional features in the technology, prior to releasing its commercial version to the public.

The development of the medicinal marijuana mobile application has many potential synergies with AAA Heidelberg as it is planned to greatly help AAA Heidelberg with its Doctor Outreach Program (see news release dated June 23, 2014) that plans on creating relationships with the doctors and clinics in southern Ontario that are pro medical marijuana in advance of the issuance of a MMPR license.
