Report on Business

1. Pasinex Resources Limited (the "Issuer") is a junior mineral exploration and development company with a focus on mineral exploration targets in Turkey.

The Issuer currently has the following properties in Turkey:

Adana Properties (Akkaya and Pinargozu): The Adana Property, called Akkaya, was acquired by Pasinex Arama ve Madencilik AS and lies within Horzum district of the Adana province, and hosts prospective limestone units, being prospective for either carbonate replacement type zinc deposit (CRD) or Mississippi Valley Type (MVT) zinc mineralization. The Pasinex 50 / 50 joint venture company (called Horzum AS) with Turkish mining company Akmetal AS acquired one property, in the same region, in May 2013, called Pinargozu. These two properties are within about 5 kilometers of each other. Pasinex is looking at these properties collectively as a regional zinc opportunity with the concept of a couple of deposits feeding a central processing operation. These properties are close to the old Horzum zinc mine where up to 4 million tonnes of high grade zinc ore was mined from 1972 to about 1996.

Golcuk Property (province of Sivas): The Golcuk property was acquired from Eurasian Minerals Inc in an option agreement announced to the market on July 25th, 2012. Golcuk is a mineralized copper-silver project located in the province of Sivas, Turkey which encompasses one exploration license that covers approximately 4,000 hectares. The project is situated within the Eastern Pontides Metallogenic Belt of northeast Turkey and was originally worked on by the Mines Bureau of Turkey and later explored by Eurasian and a Turkish minerals group Turmenka Madencilik Sanayi ve Ticaret A.S. which yielded high-grade copper results. The Golcuk property is wholly owned by Pasinex.

2. The major focus of Pasinex management in the month of May has been continuing to advance drilling on the Pinargozu and Akkaya properties, through the JV Company Horzum AS. In May a little over 1500 meters of drilling in Pinargozu and Akkaya was carried out and reported on May 26, 2015 news release which is available on the company web site or on SEDAR. This news release showed a number of holes intercepting good high grade mineralisation in a north-east extension underground at Pinargozu project. In addition, management approved the issuance of the first quarter ending March 31, 2015 financial statements and management discussion and analysis for filing on May 28, 2015 see the company web-site or SEDAR.

3. No acquisitions during the month of May. In May the company formally relinquished the license called Dadak in the province of Afyon, Turkey. The exploration expenditures on this property have been impaired in the Pasinex financial statements.
4. No drilling, exploration or production programs have been amended or abandoned.
5. No new business relationships were entered into during the period.
6. There have been no termination or expiry of contracts during the period.
7. There were no new asset acquisitions or dispositions by the Issuer during the month of May.
8. No new customers during the month of May.
9. No new developments or effects on intangible products such as brand names, circulation lists, copyrights, franchises, licenses, patents, software, subscription lists and trade-marks occurred during the month of May.
10. No new employee hiring, one employee was laid-off in Turkey, in the period.
11. No labour disputes to report.
12. No legal proceedings to which the Issuer became a party.
13. No indebtedness incurred or repaid by the Issuer.
14. During the month of May, the Company issued 190,000 incentive stock options to officers and a consultant of the Company. The options are exercisable at \$0.14 per share for a period of 5 years.
15. No loans to or by Related Persons.

17. Discuss any trends which are likely to impact the Issuer including trends in the Issuer's market(s) or political/regulatory trends.
 - a) The Issuer's properties are currently in the exploration stage only and are without known bodies of commercial ore or minerals. Development of the properties will only follow upon obtaining satisfactory results of property assessment.
 - b) Mineral exploration and development involves a high degree of risk and few properties which are explored are ultimately developed into producing mines. There is no assurance that the Company's exploration and development activities will result in any discoveries of commercial bodies or ore or minerals. The long-term profitability of the Issuer's operations will be in part directly related

to the cost and success of its exploration and subsequent evaluation programs, which may be affected by a number of factors. These include the particular attributes of the mineral deposit including the quantity and quality of the ore, proximity to or cost to develop infrastructure for extraction, financing costs, mineral prices and the competitive nature of the industry.

- c) Governmental regulations including those relating to prices, taxes, royalties, land tenure and use, the environment and the importing and exporting of minerals are of key importance to the Issuer. The effects of these factors cannot be accurately predicted, but any combination of them may result in the Issuer not receiving an adequate return on invested capital.
