HI HO SILVER SCOUTS MINING PROSPECTS RELATED TO PORT ALBERNI LNG EXPORT FACILITY

VANCOUVER, CANADA, September 8, 2015 – Hi Ho Silver Resources Inc. (CSE symbol “HHS”, OTC symbol “HHSRF”, Stuttgart Symbol “H9T”), announces today that it is reviewing mineral properties in the Port Alberni Area prospective for construction materials to potentially supply the proposed LNG export facility to be located near Port Alberni, British Columbia, Canada.

It has been reported by the Times Colonist, October 29, 2013, “Port Alberni perfect for LNG plant: Premier”. The following is extracted from the article: “Clark said there’s been significant international interest in a Port Alberni LNG facility, which could be a huge job generator for the community..... The Port Alberni Harbour Authority has secured 750 hectares of land for port growth. It is proposing two projects — a large container deep sea transshipment facility and an LNG export plant...”

Dennis H. McKnight, President and CEO of Hi HO said, "The proposed LNG projects in British Columbia offer us an opportunity to participate in providing the required construction materials to build the projects and related infrastructure that will be required to support the LNG projects. We have focused on the Port Alberni LNG project area since it provides for the unencumbered westernmost Canadian sea access. The Port Alberni Port Authority has shown its approval for this type of large scale LNG project by offering an area for the proposed LNG export facility." Mr. McKnight also stated, "I personally called the Port Authority and they have confirmed that the land is set aside. Two other LNG export projects that have garnered media attention are priced in the range of \$30 to \$40 Billion as announced by the Petronas LNG Consortium and the Shell LNG consortium."

About LNG (liquefied natural gas)

LNG natural gas is abundant, naturally occurring, safe, and reliable and has been distributed to customers in British Columbia via pipelines for over fifty years. It is odorless, colorless, non-toxic and non-corrosive and evaporates upon contact with air. The Canadian federal government is supportive of the export of LNG as it has issued one Export Licence to the Shell LNG consortium at Kitimat, B.C. The B.C. Provincial government is also supportive of LNG export facilities as evidenced by news story by CBC news of July 25, 2015, entitled “Michael de Jong heads to Malaysia to try and close LNG deal.”

About the Company

Hi Ho Silver Resources Inc. is a Vancouver based mineral exploration company dedicated to the exploration and development of precious and base-metal mineral deposits in North America and elsewhere.
