### **About Targeted Microwave Solutions Inc.**

TMS is focused on commercializing its unique, clean-coal upgrading technology, a low-cost microwave technology that reduces moisture in coal resulting in an upgraded energy content of coal. This process is expected to provide significant financial benefits to coal-fired electrical generating utilities such as: cost savings from switching to low-rank coal, increases in boiler efficiencies and heat output, improved ash efficiencies and reductions in scrubber costs. Important environmental benefits such as reductions in greenhouse gases and mercury may also be derived from implementation of the Company's technology. TMS has recently completed constructing a commercial-scale reactor facility in King William County, Virginia, U.S.A. and has entered into joint ventures for China and India to develop and market its technology.

On behalf of the Board of Directors,

*"Dr. James Young"*

Chairman of the Board of Directors
