### **RESAAS to Bring Integrated 3D Listing Content to its Platform with Matterport Technology**

**VANCOUVER, BC. (November 4, 2015)** – RESAAS Services Inc. (CSE: RSS), a cloud-based social business platform for the real estate services industry, announced today that it is working with [Matterport](#), a leader in computer vision and 3D computational photography. Matterport 3D models will be made available directly within the RESAAS platform. This integration will automatically display an interactive tour of listings within RESAAS if the agent has created a 3D Showcase with Matterport technology.

Matterport 3D Showcases provide consumers with an immersive experience of properties, creating a much more realistic environment that home shoppers can engage with online. Matterport's Pro 3D Camera and 3D Showcase software allows agents to create dimensionally accurate, high-definition models of spaces that can be explored with the click of a mouse or cursor key. Real estate agents have rapidly adopted this emerging technology, as it enables them to capture the attention of potential clients, win their listings, and stay top-of-mind as well.

"Matterport is excited to integrate our innovative 3D Showcases with the RESAAS platform," said Jeff Harris, Matterport VP of Sales and Business Development. "Bringing Matterport tours to nearly 380,000 agents internationally is a huge opportunity for us and a way to allow agents around the world to preview homes on behalf of their clients, as if they were there."

This move will allow for an easy, one-step syndication of Matterport 3D models across all RESAAS listings, further developing RESAAS into a centralized hub for all real estate technology providers.

"We always want to provide our users with the ability to showcase their properties in new and innovative ways," said Brianna MacNeil, Business Development Manager at RESAAS. "By integrating with industry leaders like Matterport, we continue to become an integral channel for real estate activity on a B2B level. We are very proud to be working with Matterport to bring exciting 3D technology to our platform."
