

PRESS RELEASE
RENFORTH RESOURCES

#304 – 65 FRONT ST. E TORONTO, ON M5E 1B5

Renforth Announces Malartic West Property Acquisition

Toronto – Nov. 17, 2015 – Renforth Resources Inc. (CSE: RFR) (“Renforth” or the “Company”) is pleased to announce the 100% acquisition of the gold bearing Malartic West Property. The 500 hectare Malartic West Property, acquired from Knick Exploration for total consideration of 4 million shares of Renforth, is located west of Renforth’s Parbec Property, contiguous to the Canadian Malartic Mine property. Previous drilling and surface work done on the property confirmed the presence of gold in the sediments and there is excess work credit on the property to keep the property in good standing for some time.

“This acquisition is strategic for Renforth, we are adding to our growing portfolio of known gold bearing ground in the Malartic and Cadillac Mining camps in Quebec, in an area of numerous gold mines and gold occurrences, dominated by major mining companies. As a junior in a challenging market we are thrilled to be able to deliver shareholder value and again increase our land holding position through consolidation. Malartic West, like Parbec, is located on strike from the significant Canadian Malartic Mine, which itself hosts both gold in quartz, like our Parbec Property, as well as broader low grade mineralization in sediments, like both Parbec and Malartic West” states Nicole Brewster, President and CEO of Renforth.

Renforth has commenced a fundraising effort through the offering of Quebec flow-through eligible units, the use of proceeds from this effort will be exploration on the Parbec Property where Renforth has presented a current exploration target for the historically known Camp Zone deposit. In addition Renforth has identified the occurrence of gold in three additional lithologies on the property, these lithologies have never been included in any previous historic

resource, nor are they included in the current exploration target. Renforth has further determined that the existing decline at Parbec, designed to reach the tuff horizon in the Camp Zone, will have crossed through these additional gold bearing lithologies, therefore providing ease of future access.

Technical information presented in this press release has been reviewed and approved by Brian H. Newton P. Geo, a “qualified person” pursuant to the guidelines laid out in National Instrument 43-101.

ABOUT RENFORTH

Renforth Resources Inc. is a Toronto-based gold exploration company with interests in two of Canada’s gold exploration camps. In the Cadillac-Malartic Gold Camp the Company holds the New Alger project, with an inferred resource of 237,000 ounces of gold above a depth of 200 metres contained in 3,505,000 tonnes with a grade of 2.1g/t Au using a cut-off of 0.75 g/t Au (see press release July 17, 2014) as calculated by Brian H. Newton P. Geo and Philip Burt P. Geo, which is located on the Cadillac Break outside of Cadillac, Quebec and an option to purchase 100% of the Parbec Property from Globex Mining Enterprises Inc. (GMX-TSE), a historically identified gold occurrence with more than 100 drillholes completed and a ramp into the mineralization in place located outside of Malartic, Quebec, contiguous to the Canadian Malartic open pit mine. In Ontario the Company has the right to earn a 55% interest in the Nixon-Bartleman project, located on the Porcupine-Destor fault in the West Timmins Mining area, another historic gold occurrence with a couple of old shallow pits onsite and a history of past drilling which has not yet defined the gold occurrence.
