

Targeted Microwave Solutions Provides Corporate Update

Vancouver, British Columbia, Canada – December 31, 2015 – Targeted Microwave Solutions Inc. (CSE: TMS; OTCQX: TGTMF) ("TMS") announced today, upon mutual agreement, the departure of Mr. Steve Sears as chief operating officer of TMS's United States subsidiaries.

Mr. Larry Siegel, chief executive officer, stated, "There will be no change to our commercialization activities, which will continue to be led from our facility in Virginia under the leadership of our chairman Dr. James Young." TMS would like to thank Steve for his service and wish him well in his future endeavours."

About Targeted Microwave Solutions Inc.

TMS is focused on commercializing its unique, clean-coal upgrading technology, a low-cost microwave technology that reduces moisture in coal resulting in an upgraded energy content of coal. This process is expected to provide significant financial benefits to coal-fired electrical generating utilities such as: cost savings from switching to low-rank coal, increases in boiler efficiencies and heat output, improved ash efficiencies and reductions in scrubber costs. Important environmental benefits such as reductions in greenhouse gases and mercury may also be derived from implementation of TMS's technology. TMS has completed constructing a commercial-scale facility in King William County, Virginia, U.S.A. and has entered into joint ventures for China and India to develop and market its technology.

On behalf of the Board of Directors,

"Dr. James Young"

Chairman of the Board of Directors
