Armada Group USA, Inc. signs consulting agreement with LegalCorrelation E-Discovery Services, Inc.

NEWS RELEASE

Armada Mercantile Ltd. (Armada), through its wholly owned subsidiary Armada Group USA, Inc. (ArmadaUSA), has signed a consulting and advisory services agreement with LegalCorrelation E-Discovery Services, Inc. (Client). Under the terms of the fee based consulting agreement, ArmadaUSA will advise and assist the Client with corporate structure along with tactical planning and will analyze the Client's resources, capital needs and offering documentation. ArmadaUSA will introduce the Client to Redrock Trading Partners, LLC to act as an 'introducing broker' on behalf of the Client for the purposes of raising capital.

About the Client: LegalCorrelation E-Discovery Services, Inc. is commercializing the Correlation Technology Platform ("CTP") in the Legal E-Discovery domain. LegalCorrelation E-Discovery Services, Inc. has acquired an exclusive license for the CTP for the Legal E-Discovery field of use in the Americas (North, Central, and South). The Correlation Technology Platform, developed by Make Sence, Inc., provides the software infrastructure required to develop the specialized software applications required for use in each vertical market. Only the Correlation Technology Platform can support N-Dimensional Queries. In an N-Dimensional Query, users submit "origin" and "destination" terms or phrases to discover if any relation exists between the origin and destination. Users can also submit "context" values to "focus" the correlation functions for specific sub-domains of the InfoBase. The basic implementation of this powerful technology yields answers in the forms of Answer Sets of Correlations, as well as a Correlation Search Engine "CSE" ranking of the most relevant sources for answers to query.

Much more information on Correlation Technology and the N-Dimensional Query can be seen on the Correlation Concepts web site at <http://www.correlationconcepts.com/>. Further, an article on the N-Dimensional Query itself - a unique feature of the Correlation Technology Platform - is available from the Visibility Magazine website at http://www.visibilitymagazine.com/internet_marketing_magazine/articles.
