

First Sahara Energy Signs Letter of Intent to Farm in on Black River Prospect in Southwestern Ontario

For Immediate Release
December 10, 2013

Vancouver, B.C., Canada – First Sahara Energy Inc. (CNSX:FSE) announced today that it has signed a Letter of Intent (LOI) with Liberty Oil & Gas Ltd. (“Liberty”), a private Calgary-based company, to farm in on Liberty’s Ordovician aged Black River oil and gas prospect at Dover East near Chatham in southwestern Ontario. The LOI is subject to a number of conditions, including successful financing, and is expected to lead to a formal farm-in agreement in early 2014.

Under the terms of the LOI, First Sahara will pay for a small 3D seismic program and the drilling of two development wells to earn a 50% working interest in the eastern extension of the Dover East Field. The 3D seismic program will overlap an existing 3D in the northwest corner of the farm-in area. The overlap will ensure good seismic coverage in order to provide optimal drilling locations.

The Dover East Field was discovered in 1983 and has produced about 1.3 million barrels of light, sweet crude and 3 billion cubic feet of associated sweet gas from the Black River formation.

The Ordovician play in southwestern Ontario is a continuation of the prolific Trenton Black River Group hydrothermal dolomite play of Ohio, Indiana, Pennsylvania, West Virginia, Michigan and New York. Over the years, the play has seen production of more than 630 million barrels of oil.

First Sahara Energy’s consulting geologist has reviewed the existing 2D and 3D seismic data on this property along with the oil and gas production in the area. Based on that review, he has concluded that this is a relatively low risk oil play with a strong chance of generating good cash flow.
