

Glenbriar installs ShoreTel system at Chilliwack Community Resilience Centre

VANCOUVER, BC – January 28, 2009 — **Glenbriar Technologies Inc.** (CNSX: GTI) announced a successful installation of a ShoreTel phone system for the City of Chilliwack’s Community Resilience Centre (CRC) in Chilliwack, BC.

The City of Chilliwack needed to set up a Community Resilience Centre (CRC) for disaster recovery due to the recent flooding and mudslides in their municipality. Their existing Nortel phone system couldn’t be connected to the new office that was created in the affected area. Erik Leidekker, IT Manager for the City of Chilliwack, called Glenbriar Technologies to help set up a phone system quickly. Within a day, Glenbriar installed a ShoreTel Pure IP Telephony system to provide stability and enhanced functionality to service the important and immediate needs of the Chilliwack CRC.

“Glenbriar quickly and efficiently installed a ShoreTel phone system,” explains Erik Leidekker. “We were able to get the system up and working within hours, with minimal training for the volunteer organizations and support staff. The phones are easy to use, easy to manage and provide the much needed functionality. Not only can we provide faster response to incoming calls but we were also able to take a phone offsite to City Hall the other day and had it working over our wireless link.”

About City of Chilliwack, Community Resilience Centre (CRC)

City of Chilliwack, Community Resilience Centre (CRC) is a multiple resource facility that serves as a one-stop shopping centre for home, farm and small business owners who are working to restore their property from damage sustained during the floods and mudslides that took place in Chilliwack during the first part of January 2009. The CRC offers a host of services and information that will be invaluable in ensuring that restoration efforts are effective in producing safe and liveable structures over the long term.
