

## NEWS RELEASE

### For Immediate Release

### GoldTrain Announces Start of Diamond-Drill Program at its Missinabie Gold Property

**TORONTO, February 18, 2010 – GoldTrain Resources Inc. (CNSX: GT)** (“GoldTrain”) is pleased to announce that a minimum 600-meter diamond drill program has started on its 100%-owned Missinabie Property. This initial program is to drill test historical and recent surface sampling results evidencing gold (Au) mineralization in the D-vein and associated shear zone. These results included:

**21.6 g Au/t over a sample length of 2.0 metres**

**18.47 g Au/t over a sample length of 3.66 metres**

**18.61 g Au/t over a sample length of 1.87 metres**

**12.51 g Au/t over a sample length of 2.74 metres**

**10.59 g Au/t over a sample length of 3.00 metres**

This shear zone and veining has been traced intermittently on surface for a strike distance of more than 200 meters.

GoldTrain’s 100%-owned Missinabie Property consists of 6 unpatented mineral exploration claims totaling 1,475 ha located 3.5 km southeast of the past-producing Renabie Gold Mine. Historical gold production from the Renabie Mine was 1,100,000 ounces at an average grade of 0.20 oz Au/ton. Gold production summaries completed at the end of 2008 indicate that this represents approximately 45% of all of the gold mined from the Wawa area. Report of Activities 2008, Resident Geologist Program, Timmins Regional Resident Geologist Report: Timmins and Sault Ste. Marie Districts; Ontario Geological Survey, Open File Report 6235, 109p.*)

The diamond drilling program will be conducted under the supervision of Joerg Kleinboeck, P.Geol, the designated Qualified Person as defined by National Instrument 43-101. Mr. Kleinboeck has reviewed and approved the scientific and technical content of this news release.

Drilling will be completed using BTW size core. All drill core will be logged on site at a secure location and samples will be submitted to ALS Chemex of Vancouver, B.C. A Quality Control and Assurance program (QA/QC) program is also in place using certified standards and blanks.

Results will be made available to the public once received, reviewed and approved by GoldTrain’s technical staff.

Technical Reports (in accordance with NI 43-101) detailing the Missinabie Property are available at [www.sedar.com](http://www.sedar.com).
