2. Provide a general overview and discussion of the activities of management.

The Company's progress towards the receipt of Federal Prospecting Permits on American Potash's Green River Potash Project (the "Project"), that would permit the Company to drill four holes on Federal lands, is ongoing. The United States Department of the Interior, Bureau of Land Management ("BLM"), has reviewed the Company's Exploration Plan and has determined it complete. In addition on June 6, 2013, the Company announced the subsequent completion by the BLM of the Environmental Assessment ("EA") conducted on the Project. The EA represents a comprehensive study of all aspects and environmental considerations associated with the proposed Exploration Plan submitted by the Company.

The final 30 day public notice period regarding the Company's Exploration Plan and BLM's Environmental Assessment on the Green River Potash Project closed on July 8, 2013. A successful conclusion to the notice period would support a 'Finding of No Significant Impact' decision on the Company's proposed action and the Company would expect the timely issuance of Federal Prospecting Permits by the BLM thereafter.

Management awaits the granting of the Federal Prospecting Permits upon a positive determination by the BLM and the subsequent sourcing of the requisite funds to initiate a Phase 1 drill program on the Project.

American Potash LLC is a company incorporated in Nevada and is a wholly-owned subsidiary of the Issuer.

**There were no loans to or by Related Persons.**

16. Provide details of any changes in directors, officers or committee members.

**There have been no changes in directors, officers or committee members.**

17. Discuss any trends which are likely to impact the Issuer including trends in the Issuer's market(s) or political/regulatory trends.

**The state of the economy and capital markets may impact on the Issuer's ability to raise the funds necessary for exploration on the potash prospects held under lease or option or exploration permit application or to exercise the option.**

**While the Issuer is well positioned with respect to acquiring mineral rights through the federal potash Prospecting Permit Application ("PPA") process, risk exists that the Issuer may be denied approval of some or all of the PPA's depending upon the outcome of the 2014 Master Leasing Plan currently under development.**

**The potash market has certain significant structural and market challenges for new entrants. Good deposits that are economical to mine are rare and barriers to entering the industry are high. Significant upfront and continuing capital investment and at least seven years are required to bring a new mine to production. However, government involvement in and ownership of the industry are low. If the Issuer exercises the option and acquires the permits there is no assurance that the properties will contain an economically viable deposit or, if the properties do contain an economically viable deposit, that the Issuer will be able to raise sufficient capital to mine the deposit.**

**The viability and profitability of developing the properties will also depend on, among other factors, continued global demand and a favourable price for potash. Rising prices have encouraged potash producers to increase production through expansion and development projects. If supply increases faster than world consumption, prices could be depressed for a prolonged period. Fluctuations in demand are characteristic of this market and there is no assurance that global demand will continue to increase or that potash prices will continue to be favourable.**
