NEWS RELEASE

COVENANT RESOURCES LTD. COMPLETES GEOPHYSICAL AIRBOURNE SURVEY

July 8, 2008 – Vancouver, British Columbia

Covenant Resources Ltd. (the “Company”) announces that it has completed its Airborne Survey on its Piebiter Gold Property in the Bralorne camp. The helicopter-borne electromagnetic survey covered 331.8 line-km. The management of the Company is reviewing the survey and will report the results of the survey upon further assessment.

The Company is a junior mining resource exploration company focused on the acquisition, exploration, and development of economically viable mineral resources. The Company’s Piebiter mineral property is comprised of three mineral claims covering 2,886.5 hectares and is located in southwest British Columbia. It is approximately 10 km along strike from the Bralorne/Pioneer mining camp. The prolific Bralorne – Gold Bridge area has produced over 4.5 million oz. of gold since 1914.

The Company Trades on the CNQ under the trading symbol “CVRL”.

For more information, please refer to the Company’s prospectus and engineering report available on SEDAR (www.sedar.com).
